DO NOW — RECALL

Paper 1 extended response challenge

Name: _____ Class: _____ Date: _____

1. What does evaluate mean?

2. What is a counterargument?

3. Why mention the scenario?

4. Half adder A=1 B=1. Give sum and carry.

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

Make a reasoned judgement, with relevant supporting evidence.

2. Model answer

A relevant limitation to the preferred choice.

3. Model answer

It decides which advantages and limitations matter.

4. Model answer

Sum0 from XOR; carry1 from AND.

By the end, you can…

• Identify scenario-specific objectives and two valid alternatives.

• Explain mechanisms and trade-offs with accurate technical details.

• Conclude with judgement grounded in costs, users, performance and security.

Vocabulary — know these terms

evaluation — Supported comparison and decision.

trade-off — Improvement with an associated cost.

context — Details of the specified use case.

justification — Evidence supporting a decision.

NEW LEARNING

Read, annotate and explain

Step 1

Identify scenario-specific objectives and two valid alternatives.

Step 2

Explain mechanisms and trade-offs with accurate technical details.

Step 3

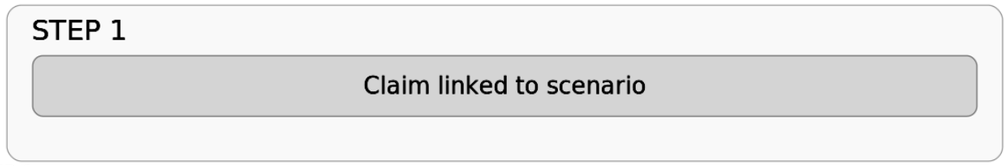

Conclude with judgement grounded in costs, users, performance and security.

Explain one step in your own words, using the correct technical terms.

STEP 1

New Learning

STEP 2

New Learning

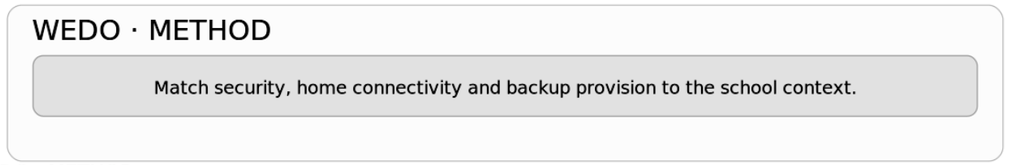

STEP 3

We Do source CHECK · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

Evaluate cloud-based coursework storage against USB-only storage for a school.

Match security, home connectivity and backup provision to the school context.

WEDO · METHOD

WE DO — CHECK AND IMPROVE

Source-grounded model answers

CHECK only after completing the guided practice and Exit Ticket. Use GREEN PEN to improve your method and explain any error.

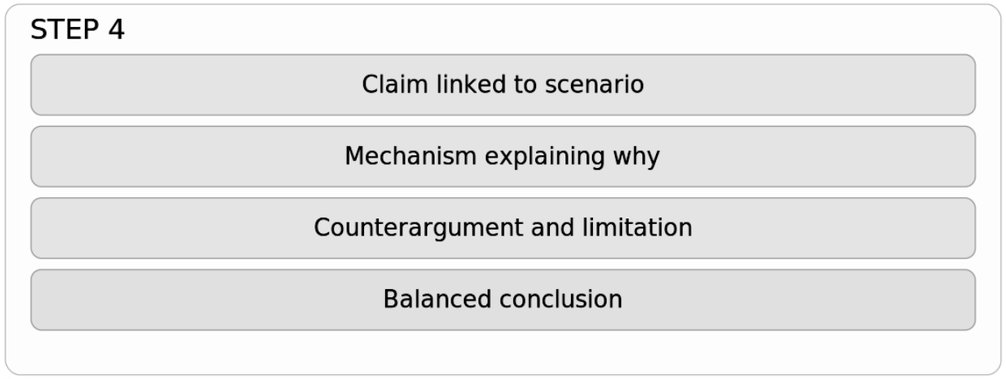

Guided 1 — CHECK

Explain the worked method
Match security, home connectivity and backup provision to the school context.

New Learning · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

New Learning

STEP 4

I DO — WORKED EXAMPLE

Follow the worked method

Evaluate SSD versus HDD for a mobile video editor.

Explain the worked method

A strong answer explains mechanical access, portability and the need for backups.

EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking.

Many disconnected technical terms guarantee full extended-response marks.

Circle: Confident / Getting there / Need help

Explain what you can now do independently.

GREEN PEN — Correct and explain

Choose one error. Write the correct method and explain precisely why your first response was wrong.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations or a justified explanation.

Question 3

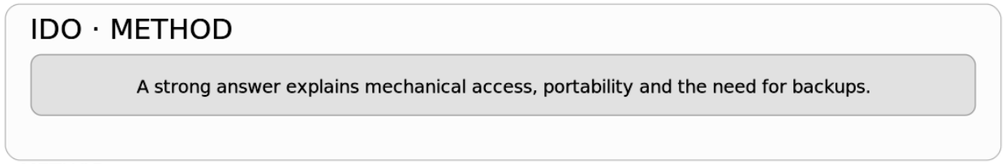

Evaluate nightly local-only backups versus secure independent off-site frequent backups for school records. [9]

I Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

Evaluate SSD versus HDD for a mobile video editor.

A strong answer explains mechanical access, portability and the need for backups.

IDO · METHOD

WE DO — GUIDED PRACTICE

Try → Discuss → Improve

TRY: Attempt the guided questions in BLACK PEN. DISCUSS: Compare approaches with a partner, explain your reasoning and agree one improvement. IMPROVE: After the Exit Ticket, use the source CHECK model in GREEN PEN to correct and explain errors.

Guided 1 — TRY

Evaluate cloud-based coursework storage against USB-only storage for a school.
Source code / input:
Cloud: convenient multi-device access and managed permissions. USB: offline access, but loss/damage risk.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations or a justified explanation.

Question 1

Improve 'the cloud is better' for a school, explaining a benefit, limitation and judgement. [6]

Question 2

Evaluate GPU versus multicore CPU for video analysis and general tasks. [9]
