BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Assessment Feedback and Corrections

Name _____ **Class** _____ **Date** _____ **Time** _____ **Teacher** _____

Do Now - Four retrieval questions

1. In a trace table, should you record executed variable updates or only variable names?

2. Which description matches a NOT gate symbol?
   A) Triangle with output circle
   B) Flat input; rounded output
   C) Curved input; pointed output
   D) A decision diamond

3. An indicator uses Q = NOT A. Give outputs for A=0 and A=1, then evaluate NOT(NOT A) for both values.

4. Linear-search [7, 2, 9, 4] for 2, starting at index 0. List the values checked. How many comparisons are needed?

Today's objectives

Explain the core ideas of assessment feedback and corrections using accurate OCR terminology. Apply a clear method to the worked and guided questions.

Key vocabulary - Read, cover, recall

Read feedback
Identify exactly which assessment marking point was not secured.

Correct the method
Amend the explanation or algorithm, not merely the final answer.

Use a model
Compare the original response with a worked mark-scheme-aligned solution.

Transfer
Apply the same correction to a new question without copying the worked example.

BLACK PEN: Write one definition in your own words.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Learn and practise

New Learning - Key ideas

Read feedback
Identify exactly which assessment marking point was not secured.

Correct the method
Amend the explanation or algorithm, not merely the final answer.

Use a model
Compare the original response with a worked mark-scheme-aligned solution.

Transfer
Apply the same correction to a new question without copying the worked example.

I Do - Worked model

A student writes 'virtual memory makes RAM faster'. Improve the answer to earn two explanation marks.

- Identify the misconception: virtual memory is not physical RAM.
- Explain that secondary storage backs some pages when RAM is insufficient.
- Explain secondary storage access is slower than RAM.
- Write a concise corrected two-sentence response.

We Do - Guided practice

1. A search answer omits 'sorted' before binary search. Improve it.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Think and write

Code First - Predict > Write > Test > Improve

YOUR TASK: Correct the midpoint formula in a supplied search trace.

```
low = 0
high = 8
mid = (low + high) * 2
print(mid)
```

You Do - Independent exam questions

Q2. Correct: 'ROM loses its data when power is removed'. [2 marks]

Q3. A student's trace omits the final loop iteration. Explain the impact. [2 marks]

Q4. Write an improvement target for an incomplete 4-mark explanation. [2 marks]

Exit Ticket - True or False?

Corrections should address the method, not just the final value.

TRUE [ ] **FALSE [ ]**

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Review & improve

GREEN PEN: Tick each correct point; correct mistakes.

Do Now - Model answers

1. Executed variable updates in their actual order.

2. A - Triangle with output circle

3. Q: 1, 0. Double NOT: 0, 1, restoring A.

4. (a) [7, 2]; 2 comparison(s), found at index 1.

I Do - Explain the model

Identify the misconception: virtual memory is not physical RAM.

Explain that secondary storage backs some pages when RAM is insufficient.

Explain secondary storage access is slower than RAM.

Write a concise corrected two-sentence response.

We Do - Model answers

1. Binary search works on sorted data, repeatedly halving the active range.

Code First - Answer

```
low = 0
high = 8
mid = (low + high) DIV 2
print(mid)
```

Expected output: 4

You Do - Self-mark

Q2: ROM is non-volatile; contents remain without power.

Q3: The last update is missed, so the final recorded state and possibly output are incorrect.

Q4: Use four accurate, distinct causal points linked to the scenario and check each against marks.

GREEN PEN: Choose the hardest answer. Correct it on lined paper.
