**BLACK PEN** Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

# Legislation and Copyright

**Name** _____ **Class** _____ **Date** _____ **Time** _____ **Teacher** _____

## Do Now - Four retrieval questions

1. Give a cultural impact of digital technology.

2. What does anti-malware detect?
   A) Every future threat
   B) Malicious software
   C) All hardware faults
   D) All weak passwords

3. "Every pupil needs full administrator rights for a secure network." Correct this. Explain why.

4. A new printer will not work. "A printer driver only stores website passwords." Correct this. How could the right driver help?

## Today's objectives

Explain the core ideas of legislation and copyright using accurate OCR terminology. Apply a clear method to the worked and guided questions.

## Key vocabulary - Read, cover, recall

**Data protection**

Personal data must be handled lawfully, fairly and securely under applicable UK data-protection rules.

**Computer Misuse Act**

Unauthorised access and certain unauthorised acts involving computer systems are offences.

**Copyright**

Protects creators' original works against unauthorised copying and distribution, subject to exceptions/licences.

**Licensing and scenario**

Decisions must consider permissions, access rights and purpose rather than treating all digital copying as legal.

**BLACK PEN: Write one definition in your own words.**

**BLACK PEN** Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

# Learn and practise

## New Learning - Key ideas

**Data protection**
Personal data must be handled lawfully, fairly and securely under applicable UK data-protection rules.

**Computer Misuse Act**
Unauthorised access and certain unauthorised acts involving computer systems are offences.

**Copyright**
Protects creators' original works against unauthorised copying and distribution, subject to exceptions/licences.

**Licensing and scenario**
Decisions must consider permissions, access rights and purpose rather than treating all digital copying as legal.

## I Do - Worked model

**A student copies a paid program onto every school laptop without permission. Identify the legal issue.**

- Identify software as copyright-protected work.
- Explain licence terms may not permit copying/installation on additional machines.
- Describe need for correct licences or permission.
- Do not confuse copyright infringement with automatically being a Computer Misuse Act offence.

## We Do - Guided practice

1. An employee accesses another person's account without permission. Identify law and rationale.

---

**BLACK PEN** Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

# Think and write

## Code First - Predict > Write > Test > Improve

**YOUR TASK: Write the missing output when an optional personal-data field is unnecessary.**

```
neededForService = false
if neededForService then
print("Collect")
else
...
endif
```

## You Do - Independent exam questions

Q2. Name the UK law relevant to unauthorised access to a computer. [1 mark]

Q3. Give one legal consideration when installing licensed software on many computers. [2 marks]

Q4. Explain one principle of data protection for school pupil records. [3 marks]

## Exit Ticket - True or False?

Knowing somebody's password automatically authorises access to their account.

**TRUE [ ]** **FALSE [ ]**

**BLACK PEN** Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

# Review & improve

GREEN PEN: Tick each correct point; correct mistakes.

## Do Now - Model answers

1. Digital communication can change language, access, traditions and how people take part in communities.

2. B - Malicious software

3. Give users only the access rights they need. This limits access without permission and possible damage.

4. A driver lets the OS communicate with and control a peripheral, such as a printer.

## I Do - Explain the model

Identify software as copyright-protected work.

Explain licence terms may not permit copying/installation on additional machines.

Describe need for correct licences or permission.

Do not confuse copyright infringement with automatically being a Computer Misuse Act offence.

## We Do - Model answers

1. State that knowing the password alone does not supply permission.

## Code First - Answer

```
neededForService = false
if neededForService then
print("Collect")
else
print("Do not collect")
endif
```

Expected output: Do not collect

## You Do - Self-mark

Q2: Computer Misuse Act 1990.

Q3: Whether the licence permits the number and type of installations.

Q4: Collect/use for lawful specified purpose, minimise data and keep appropriately secure.

**GREEN PEN: Choose the hardest answer. Correct it on lined paper.**
