BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Paper 1: Software, Impacts and Legislation

Name _____ **Class** _____ **Date** _____ **Time** _____ **Teacher** _____

Do Now - Four retrieval questions

1. How does encryption protect transmitted data?

2. What does FROM name in SQL?
   A) The output columns
   B) The filter condition
   C) The source table
   D) The sort order

3. "A syntax error is any incorrect answer produced by syntactically valid code." Correct this. Explain why.

4. A program repeats the same price calculation in several places. "Copying long code blocks always makes maintenance easier." Correct this. How would a subprogram help?

Today's objectives

Explain the core ideas of paper 1: software, impacts and legislation using accurate OCR terminology. Apply a clear method to the worked and guided questions.

Key vocabulary - Read, cover, recall

Operating-system services

Manage memory, files, processes and peripherals.

Utility tools

Encryption, compression and HDD defragmentation serve different needs.

Societal impacts

Evaluate benefit and risk for identified stakeholders.

Legal framework

Match misuse, copyright and personal-data concerns to the appropriate legislation/rules.

BLACK PEN: Write one definition in your own words.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Learn and practise

New Learning - Key ideas

Operating-system services
Manage memory, files, processes and peripherals.

Utility tools
Encryption, compression and HDD defragmentation serve different needs.

Societal impacts
Evaluate benefit and risk for identified stakeholders.

Legal framework
Match misuse, copyright and personal-data concerns to the appropriate legislation/rules.

I Do - Worked model

Evaluate a school cloud backup service in terms of benefits and risks.

- Off-site backups can support data recovery.
- Internet dependency and availability can limit access.
- Student records need protected access and appropriate lawful handling.
- Justify using secure, tested backup procedures.

We Do - Guided practice

1. A staff member uploads copyrighted media without permission. Identify the issue.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Think and write

Code First - Predict > Write > Test > Improve

YOUR TASK: Complete the Boolean expression that rejects collecting data without a purpose.

```
hasPurpose = false
if ... then
print("Collect data")
else
print("Do not collect")
endif
```

You Do - Independent exam questions

Q2. Give one benefit of OS multitasking. [2 marks]

Q3. What is the main purpose of a compression utility? [2 marks]

Q4. Identify relevant law for accessing another user's account without permission. [1 mark]

Exit Ticket - True or False?

Operating systems can manage more than one running process.

TRUE [ ] **FALSE [ ]**

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Review & improve

GREEN PEN: Tick each correct point; correct mistakes.

Do Now - Model answers

1. Encryption changes plaintext into ciphertext. Someone who intercepts it cannot easily read it without the key.

2. C - The source table

3. A syntax error breaks the language's rules. The affected code cannot be translated or run correctly.

4. Put shared code in one subprogram. It can be reused, tested and changed in one place.

I Do - Explain the model

Off-site backups can support data recovery.

Internet dependency and availability can limit access.

Student records need protected access and appropriate lawful handling.

Justify using secure, tested backup procedures.

We Do - Model answers

1. Conclude possible copyright infringement.

Code First - Answer

```
hasPurpose = false
if hasPurpose then
print("Collect data")
else
print("Do not collect")
endif
```

Expected output: Do not collect

You Do - Self-mark

Q2: Allows multiple applications/processes to make progress through scheduling.

Q3: Reduce the size of stored/transmitted data.

Q4: Computer Misuse Act 1990.

GREEN PEN: Choose the hardest answer. Correct it on lined paper.
