STAFF REVIEW · H446 117 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Linker resolves modules/symbols; loader maps executable into memory to run.

2. O(n).

3. B, because a stack is LIFO.

4. It discards half the search space using an ordering comparison.

I Do — source worked steps

1. Model answer — A plan-driven/waterfall approach can support documented phase gates and traceability; however, testing and validation must still occur throughout as appropriate. Safety assurance matters more than simply labelling it waterfall. — Check: link each claim to the scenario and use precise OCR terminology.

We Do — guided CHECK

1. What must we decide?
Identify the inputs, relevant facts and exact output or judgement required.
Work through the method
Use the middle stage of the visual to follow the process and state each intermediate result.
Shared worked answer
Agile iterations with prioritised backlog, frequent releases and real user feedback. A strictly sequential plan risks discovering changed needs late. Maintain security and test discipline.

You Do — source mark schemes

1. Clear ordered stages [4]; late changes cause costly rework/approval delays [2].

2. Iterative increments [2], stakeholder feedback [2], adaptive backlog/prioritisation or continuous tests [2].

3. Fixed controls/documentation [2], agility for regulatory change [2], test and migration risks [2], justified hybrid/choice [2].

Exit Ticket — source answer

1. False. Quality activities remain essential.
