STAFF REVIEW · H446 119 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. For example TDD, pair programming, CI or frequent refactoring.

2. 1.

3. X is removed; Y remains at the front.

4. O(n).

I Do — source worked steps

1. Model answer — Each cycle sets goals, identifies risks such as fraud or performance, prototypes/assesses the riskiest elements, evaluates with stakeholders then plans the next cycle. Risk reduction drives the project. — Check: link each claim to the scenario and use precise OCR terminology.

We Do — guided CHECK

1. What must we decide?
Identify the inputs, relevant facts and exact output or judgement required.
Work through the method
Use the middle stage of the visual to follow the process and state each intermediate result.
Shared worked answer
RAD/agile could produce accessible prototypes quickly with visitor feedback, but test accessibility systematically. Spiral may be excessive for a small low-risk app; compare project scale and uncertainty.

You Do — source mark schemes

1. Objectives planning [2], explicit risk analysis/prototyping [2], development/evaluation/next-cycle planning [2].

2. Risk analysis overhead/cost [3]; complex management and limited benefit when uncertainty is low [3].

3. At least three accurate contrasting features [4], context-linked risk/testing/cost discussion [2], justified selection or combination [2].

Exit Ticket — source answer

1. False. Risk identification and reduction drive the cycles.
