STAFF REVIEW · H446 154 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Client checks are bypassable.

2. On sorted data.

3. Stack.

4. A reference to a key in another table.

I Do — source worked steps

1. Tokenise both pages — Identify the input or diagram and predict the first result.

2. Map terms to page IDs — Follow the second stage and explain its importance.

3. Match search → A — binary→A,B; search→A; tree→B. The query 'binary search' intersects both postings and retrieves A.

We Do — guided CHECK

1. Index terms
Identify the input or diagram and predict the first result.
Intersect term postings
Follow the second stage and explain its importance.
Return D
Inverted index: encryption→C,D and hash→D. Intersecting returns D. A search engine may rank by further signals after matching.

You Do — source mark schemes

1. Crawler discovers/downloads pages [3], index stores searchable mapping [3].

2. cat→P, dog→P,Q, bird→Q [4]; Q intersection [2].

3. Discovery delays [2], indexing rules [2], update/crawl frequency [2], robots suggestions do not enforce access control [2].

Exit Ticket — source answer

1. False. Index identifies candidates; ranking orders them.
