STAFF REVIEW · H446 156 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Each outgoing link gets a share of source importance.

2. Stack.

3. A reference to a key in another table.

4. Forward packets between IP networks.

I Do — source worked steps

1. Browser value is untrusted — Identify the input or diagram and predict the first result.

2. Server checks permissions — Follow the second stage and explain its importance.

3. Reject forbidden edit — The server must authenticate the user and enforce edit permissions, ignoring unauthorised mark values. It validates requests and writes to the authoritative database only after checking access.

We Do — guided CHECK

1. Public quiz
Identify the input or diagram and predict the first result.
Browser computes feedback
Follow the second stage and explain its importance.
No private data stored
Client-side JavaScript can show hints immediately with fewer server requests; if restricted answers or persistent records matter, keep them server-controlled.

You Do — source mark schemes

1. Fast feedback [2], reduced server requests [2], tampering/limited client resources [2].

2. Client untrusted [2], authorisation check [2], database change controlled centrally [2].

3. Public local feedback [2], authenticated server reports [2], cached offline resources [2], balanced security/latency [2].

Exit Ticket — source answer

1. False. Server must independently authorise.
