Do Now · retrieval

Lesson 157 · Data Protection: OCR's 1998 Act and Today's UK Law

Name: _____ Class: _____ Date: _____

Answer four retrieval questions before reviewing earlier learning.

Q1

Why must a server validate data sent by a browser?

Q2

What is the purpose of an operating system's memory management?

Q3

What is the worst-case order of binary search?

Q4

Why does the TLS padlock not guarantee a site is honest?

New Learning · key ideas

The important knowledge from today's lesson. Read, annotate, and explain it.

Core idea 1

OCR historic focus — DPA 1998 protected living people's personal data; OCR names this Act in 1.5.1.

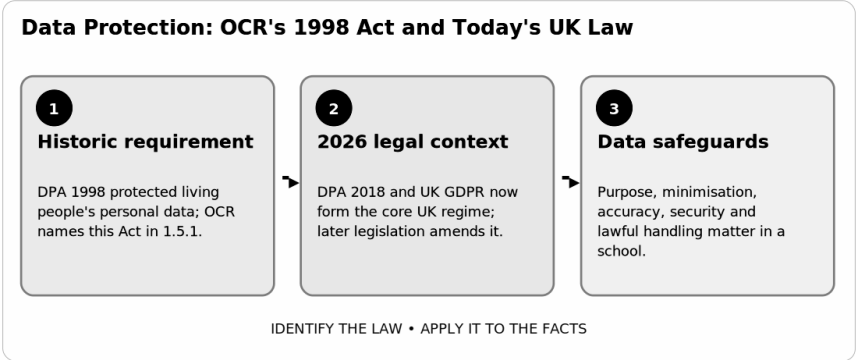

Core idea 2

Current framework — DPA 2018 and UK GDPR now form the core UK regime; later legislation amends it.

Core idea 3

Apply principles — Purpose, minimisation, accuracy, security and lawful handling matter in a school. OCR 1.5.2 also asks for ethical judgement : monitoring and analysing personal data may be permitted in particular circumstances yet still introduce bias, unjustified intrusion or harmful automated decisions.

Key visual · complete concept

Annotate the key visual

Explain which labels or features show the main process.

New Learning · applying the ideas

Vocabulary · use the correct technical terms

personal data — Information relating to an identified or identifiable living person.

data minimisation — Collect only data necessary for a specified purpose.

controller — Organisation deciding purposes and means of processing.

UK GDPR — Current UK data protection regulatory framework alongside DPA 2018.

Check your understanding

Explain one key process in your own words using two of the terms above.

More animated examples are available in the original online lesson.

I Do · worked example

Problem

A school stores student medical notes alongside general attendance records and permits every staff member to open them. Identify data-protection issues.

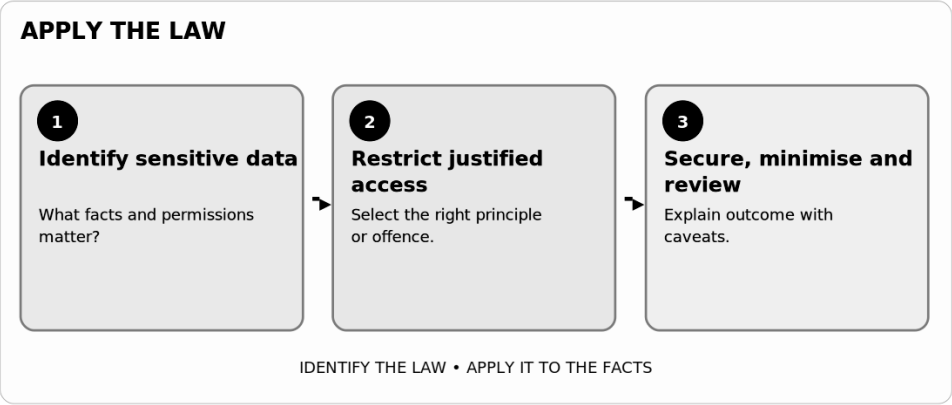

Follow the worked method

1. Identify sensitive data — Identify the relevant facts, purpose and authority.

2. Secure, minimise and review — Medical information is sensitive personal data with stronger protections. Restrict access by legitimate role, use a proper lawful basis and relevant special-category condition, minimise collected fields, keep information accurate and protect access. DPA 1998 is named historically by OCR but current UK law is DPA 2018/UK GDPR.

3. Human review before action — No automatic sanction. Check original entries, pupil circumstances and the model's limitations; use verified information for supportive intervention. Compliance with data protection law alone does not guarantee an ethically fair decision.

Source model · final illustrated step

Why this method works

Identify the decision, rule or invariant that makes the method correct.

We Do · Try → Discuss → Improve

TRY independently in BLACK PEN; compare methods with a partner; improve your reasoning.

Guided problem · TRY

Quiz purpose identified
Identify the relevant facts, purpose and authority.

DISCUSS

Compare how you reached the answer. Where could someone make an error?

IMPROVE

Add one precise correction or a stronger reason. Answers are not printed here.

You Do · independent practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 1

State three obligations or principles associated with protecting personal data, applied to a school. [6]

Question 2

Explain the distinction between OCR naming the Data Protection Act 1998 and the modern UK data-protection framework. [6]

You Do · extended practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 3

A school proposes publicly sharing a named student progress spreadsheet and automatically sanctioning pupils flagged by an AI model trained on incomplete attendance records. Evaluate legal and ethical risks. [8]

Check that you have used the technical terms and explained your decisions.

Exit Ticket · reflect and retrieve

Exit Ticket

The Data Protection Act 1998 remains the UK's principal current data protection law.

Use key vocabulary from memory

1. Explain personal data in your own words.

2. Explain data minimisation in your own words.

3. Explain controller in your own words.

Confidence and next step

How confident are you? Thumbs up / side / down

Which question would you improve after checking the classroom model?

Check answers after the lesson using the teacher-guided source models.
