Exit Ticket · reflect and retrieve

Exit Ticket

Knowing a valid password always makes access legally authorised.

Use key vocabulary from memory

1. Explain unauthorised access in your own words.

2. Explain section 1 in your own words.

3. Explain section 2 in your own words.

Confidence and next step

How confident are you? Thumbs up / side / down

Which question would you improve after checking the classroom model?

Check answers after the lesson using the teacher-guided source models.

RHS COMPUTING / OCR H446 / LESSON 158 DRAFT · TEACHER REVIEW

Do Now · retrieval

Lesson 158 · Computer Misuse Act 1990: Permission and Offences

Name: _____ Class: _____ Date: _____

Answer four retrieval questions before reviewing earlier learning.

Q1

What UK legislation replaced the Data Protection Act 1998?

Q2

What is the worst-case order of binary search?

Q3

What is referential integrity?

Q4

What is the purpose of an operating system's memory management?

New Learning · key ideas

The important knowledge from today's lesson. Read, annotate, and explain it.

Core idea 1

Unauthorised access — Section 1 concerns knowing unauthorised access to computer material.

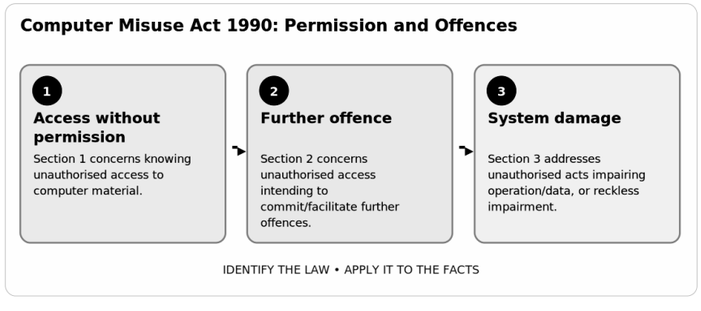

Core idea 2

Further criminal intent — Section 2 concerns unauthorised access intending to commit/facilitate further offences.

Core idea 3

Impairment — Section 3 addresses unauthorised acts impairing operation/data, or reckless impairment.

Key visual · complete concept

Annotate the key visual

Explain which labels or features show the main process.

You Do · extended practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 3

Compare three cases: unauthorised account entry, entry to facilitate fraud, and deliberately disabling a network service. Relate to sections 1, 2, 3. [8]

Check that you have used the technical terms and explained your decisions.

You Do · independent practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 1

Explain the distinction between knowing unauthorised access and access with further criminal intent. [6]

Question 2

A pupil logs into a friend's account without permission but changes nothing. Explain whether absence of damage guarantees legality. [6]

New Learning · applying the ideas

Vocabulary · use the correct technical terms

unauthorised access — Access without the required permission.

section 1 — Knowing unauthorised access to computer material.

section 2 — Unauthorised access intending to commit or facilitate another offence.

section 3 — Unauthorised acts intending or recklessly causing impairment.

Check your understanding

Explain one key process in your own words using two of the terms above.

More animated examples are available in the original online lesson.

I Do · worked example

Problem

A pupil correctly guesses a teacher's password, then signs in to view private records despite knowing permission is absent. Which offence may apply?

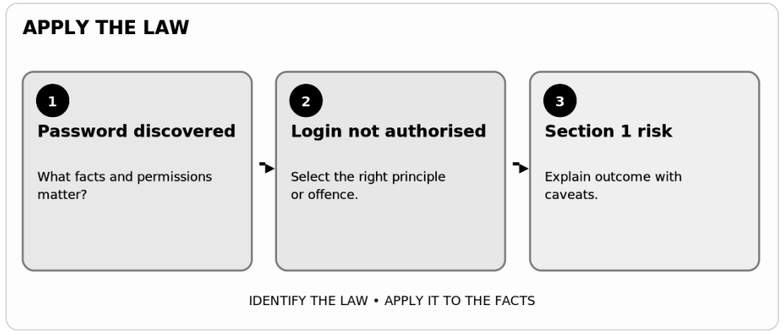

Follow the worked method

1. Password discovered — Identify the relevant facts, purpose and authority.

2. Login not authorised — Discuss which law or safeguard fits the situation.

3. Section 1 risk — Section 1 can apply to knowing unauthorised access even if no data is changed. The correct password does not supply authorisation. Additional offences depend on intent and conduct; do not assume every access is a section 2 offence.

Source model · final illustrated step

Why this method works

Identify the decision, rule or invariant that makes the method correct.

We Do · Try → Discuss → Improve

TRY independently in BLACK PEN; compare methods with a partner; improve your reasoning.

Guided problem · TRY

Action without authority
Identify the relevant facts, purpose and authority.

DISCUSS

Compare how you reached the answer. Where could someone make an error?

IMPROVE

Add one precise correction or a stronger reason. Answers are not printed here.
