Lesson 159 · Copyright, Designs and Patents Act 1988: Code and Digital Content

Name: _____ Class: _____ Date: _____

Answer four retrieval questions before reviewing earlier learning.

Q1

What matters more than having a valid password under the Computer Misuse Act?

Q2

What is referential integrity?

Q3

Why does the TLS padlock not guarantee a site is honest?

Q4

What is the worst-case order of binary search?

New Learning · key ideas

The important knowledge from today's lesson. Read, annotate, and explain it.

Core idea 1

Identify protected work — Original software code, images, text and music can attract copyright automatically.

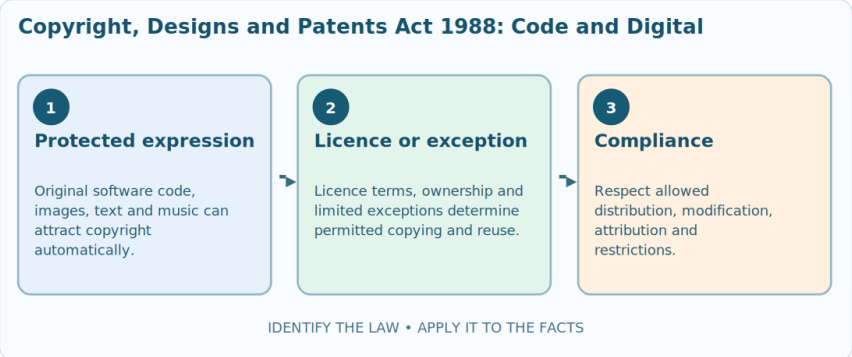

Core idea 2

Check permission — Licence terms, ownership and limited exceptions determine permitted copying and reuse.

Core idea 3

Use responsibly — Respect allowed distribution, modification, attribution and restrictions.

Key visual · complete concept

Annotate the key visual

Explain which labels or features show the main process.

New Learning · applying the ideas

Vocabulary · use the correct technical terms

copyright — Legal protection for original expression including software code and images.

licence — Permission defining use and distribution conditions.

attribution — Credit to creator, distinct from reproduction permission.

fair dealing — Specific limited UK copyright exceptions with applicable conditions.

Check your understanding

Explain one key process in your own words using two of the terms above.

More animated examples are available in the original online lesson.

I Do · worked example

Problem

A pupil copies an online graphic into a public school website, includes the photographer's name but has no permission. Is attribution enough?

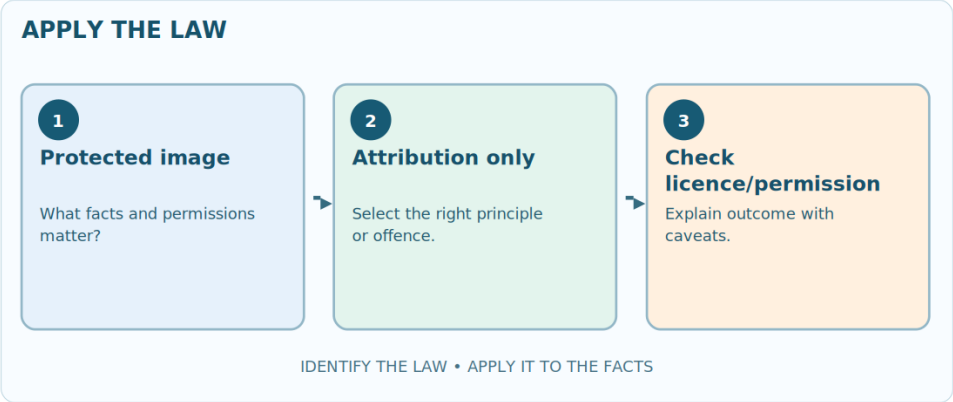

Follow the worked method

1. Protected image — Identify the relevant facts, purpose and authority.

2. Attribution only — Discuss which law or safeguard fits the situation.

3. Check licence/permission — Not generally. Crediting the creator is good practice but does not itself grant permission. Check the licence or applicable limited exception before publicly reproducing the image; choose licensed/own work if uncertain.

Source model · final illustrated step

Why this method works

Identify the decision, rule or invariant that makes the method correct.

We Do · Try → Discuss → Improve

TRY independently in BLACK PEN; compare methods with a partner; improve your reasoning.

Guided problem · TRY

Code with licence
Identify the relevant facts, purpose and authority.

DISCUSS

Compare how you reached the answer. Where could someone make an error?

IMPROVE

Add one precise correction or a stronger reason. Answers are not printed here.

You Do · independent practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 1

Describe two types of digital work protected by copyright, and one typical right holder control. [6]

Question 2

Explain why adding an acknowledgement does not necessarily permit publication of a copyrighted photograph. [6]

You Do · extended practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 3

A student wants to publish a free revision site with online diagrams, quoted textbook paragraphs and open-source sample code. Evaluate three permission routes. [8]

Check that you have used the technical terms and explained your decisions.

Exit Ticket · reflect and retrieve

Exit Ticket

Any copyrighted image can be republished legally if the creator's name is shown.

Use key vocabulary from memory

1. Explain copyright in your own words.

2. Explain licence in your own words.

3. Explain attribution in your own words.

Confidence and next step

How confident are you? Thumbs up / side / down

Which question would you improve after checking the classroom model?

Check answers after the lesson using the teacher-guided source models.
