STAFF REVIEW · H446 203 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. ¬A ∧ ¬B.

2. A collision.

3. 0.

4. B, at value 1.

I Do — source worked steps

1. Predict and explain — B and C each vary across the row; neither is needed in the expression.

2. Check and extend — A stays 0 in the whole group. The simplified term is ¬A.

We Do — guided CHECK

1. Predict and explain
A changes between rows, and C changes between columns 11 and 10.
Check and extend
B remains 1, so the simplified term is B.

You Do — source mark schemes

1. To simplify the Boolean expression by removing variables that change inside a group.

2. A. Both B and C change within the row, while A remains 1.

3. ¬C. A changes between the rows and B changes between 00 and 10; C stays 0.

Exit Ticket — source answer

1. True. The group leaves only variables constant across all four cells.
