STAFF REVIEW · H446 207 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. It processes jobs in arrival order (FIFO).

2. It must be sorted.

3. Six times.

4. 16.

I Do — source worked steps

1. Predict — One loop visits five elements, so does five operations.

2. Explain — The nested loop repeats five operations five times, making 25.

We Do — guided CHECK

1. Explain
A standard midpoint binary search needs at most seven comparisons on 64 sorted values.

You Do — source mark schemes

1. O(n).

2. 100 and 10,000 respectively.

3. It does not need the sorting preparation required before binary search.

Exit Ticket — source answer

1. False. It describes growth of work, not a fixed duration.
