STAFF REVIEW · H446 235 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. An early model that users evaluate and refine.

2. To catch regressions while new features are introduced.

3. Both conditions must be true.

4. 11, 12, 16 and 17.

I Do — source worked steps

1. Predict first — Test just below and at the lower limit: 7 rejected, 8 accepted.

2. Model and explain — Also test a normal 14, upper boundary 20, and 21 rejected.

We Do — guided CHECK

1. Predict first
Lower boundary 1 is accepted while 0 is invalid.
Model and explain
Upper boundary 30 is accepted while 31 is invalid; 16 is a representative normal value.

You Do — source mark schemes

1. [4] Example 25 [1]; 10 [1]; 40 [1]; 9 (or 41) [1].

2. [6] bool Valid(int x)=>x>=1&&x<=9; [2]. Test 0 false [1], 1 true [1], 9 true [1], 10 false [1].

3. [6] Existing tests include boundaries [2] but no immediately invalid values [1]; add 19 and 41 expected rejection [2], and a representative interior value such as 27 expected acceptance [1].

Exit Ticket — source answer

1. False. Erroneous and boundary-adjacent tests are also needed.
