

Lesson 4 - OneDrive & Class Notebook

Pupil booklet · use this alongside the web lesson

DO NOW · 5 MINUTES

Start from memory

1. When you finish a Teams assignment, what should you do?

- ☐ Leave it open
- ☐ Use Hand In
- ☐ Email everyone

2. Which app is used to create your Class Notebook?

- ☐ Microsoft OneNote
- ☐ Paint
- ☐ Calculator

3. What is an assignment?

4. What is the Shared area used for?

OBJECTIVES

OneDrive

Use OneDrive to store and organise files.

Class Notebook

Use Class Notebook to evidence completed work.

Screenshots

Take screenshots and copy and paste them into work.

NEW LEARNING

Why use OneDrive?

OneDrive is online storage for your files. It helps you organise school work and access it from home and school.

Good habit: Store school work in your OneDrive so you can find it again on different school devices and at home.

Organise your OneDrive

Create a clear folder structure for your school work.

I DO → YOU DO

Example folder structure

OneDrive - Reepham High School & College

- 📁 Year 7
- 📁 Computing
- 📁 English
- 📁 Maths
- 📁 Science
- 📁 Other subjects as needed

Your task

- ☐ Open OneDrive using the route demonstrated by your teacher.
- ☐ Create a **Year 7** folder if you do not already have one.
- ☐ Create a **Computing** folder inside Year 7.
- ☐ Create folders for your other subjects when needed.
- ☐ Check that folder names are clear and correctly spelt.

Remember: the Microsoft 365 layout may look slightly different on different devices. Follow your teacher's current demonstration if a button has moved.

WE DO

Which folder name is clearest?

A file contains your Computing work for Lesson 4. Where should it go?

- ☐ Downloads ☐ Year 7 → Computing

Which folder name is easier to understand later?

- ☐ Stuff ☐ Year 7 Computing

Class Notebook & screenshots

Evidence the work you have already completed.

I DO

What is Class Notebook for?

Each unit can have a page in your Class Notebook. You can use it to keep notes and evidence of your work so your teacher can check your understanding, effort and presentation.

SCREENSHOT

Capture just the evidence you need

Windows + Shift + S

Choose the area you need, then paste the screenshot into Class Notebook. Crop it so the important work is easy to see.

YOU DO

Add evidence from your first lessons

- ☐ Open the **7.1 Introduction to Computing** page in Class Notebook.
- ☐ Add the date to the correct row or section.
- ☐ Add a screenshot of the email you sent for Lesson 2/homework.
- ☐ Add a screenshot of the Teams assignment you completed in Lesson 3.
- ☐ Crop screenshots so they show the work clearly.
- ☐ Check that your evidence is readable before you finish.

Privacy: do not include passwords or unnecessary personal information in a screenshot.

Vocabulary & exit check

KEY VOCABULARY

OneDrive

Online storage for your files.

Screenshot

A picture taken of what is shown on your screen.

Class Notebook

A part of your Team used to write and evidence learning from lessons.

OneNote

The Microsoft app used to create your Class Notebook.

EXIT QUESTIONING

1. Why is OneDrive useful for school work?

2. Which app is used to create Class Notebook?

☐ OneNote ☐ Paint ☐ Calculator

3. What keyboard shortcut can start a screenshot on Windows?

4. Name two pieces of evidence you added to Class Notebook today.

PRESENTATION

Computing work is usually presented clearly. Keep files organised, crop screenshots neatly and make sure evidence is readable.

Lesson check: Before you leave, make sure your OneDrive folders are organised and your Class Notebook contains the evidence your teacher requested.
