DO NOW — RECALL

Lesson 151 · CSS: Selectors, Cascade, Specificity and th

Name: _____ Class: _____ Date: _____

1. How does HTML associate a label with an input?

2. What data structure follows LIFO?

3. What is a database foreign key?

4. What is the role of a router?

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

label for matches input id.

2. Model answer

Stack.

3. Model answer

A reference to a key in another table.

4. Model answer

Forward packets between IP networks.

By the end, you can…

• Element p, class .notice and ID #notice target elements.

• Specificity affects which competing declaration wins.

• Content, padding, border and margin affect occupied space.

Vocabulary — know these terms

selector — Rule matching HTML elements.

specificity — Priority of selectors among competing declarations.

box model — Content plus padding, border, margin.

cascade — Conflict resolution for CSS rules.

NEW LEARNING

Read, annotate and explain

Select

Element p, class .notice and ID #notice target elements.

Prioritise

Specificity affects which competing declaration wins.

Measure

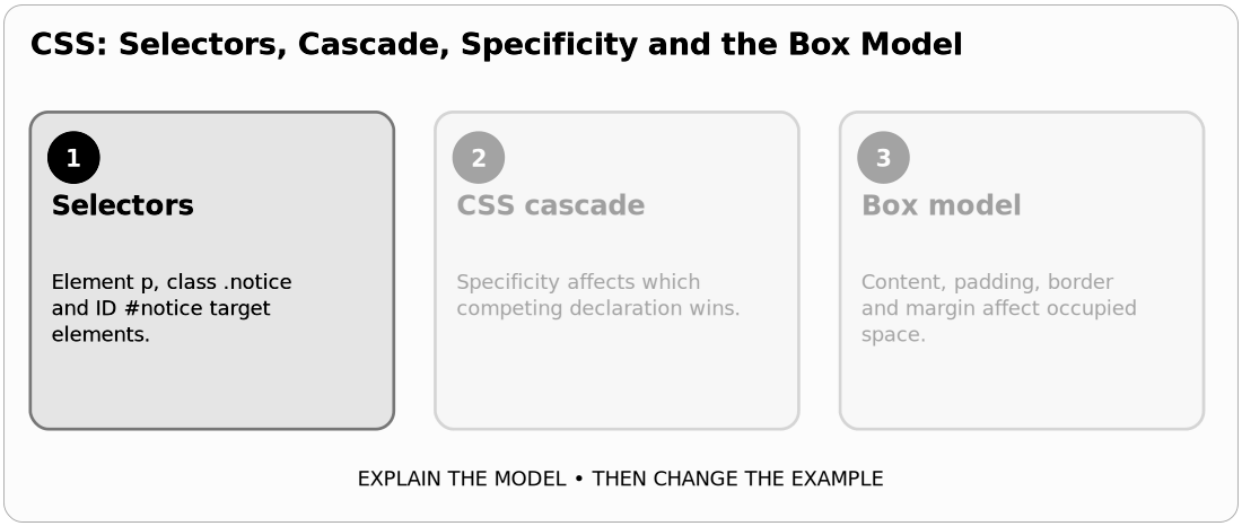

Content, padding, border and margin affect occupied space.

Explain one step in your own words, using the correct technical terms.

CSS: Selectors, Cascade, Specificity and the Box Model: Selectors, CSS cascade, Box model

I DO — WORKED EXAMPLE

Follow the worked method

p{color:black}, .notice{color:blue}, #flag{color:green} all match one element. Which colour?

Type selects black

Identify the input or diagram and predict the first result.

Class selects blue

Follow the second stage and explain its importance.

ID selects green

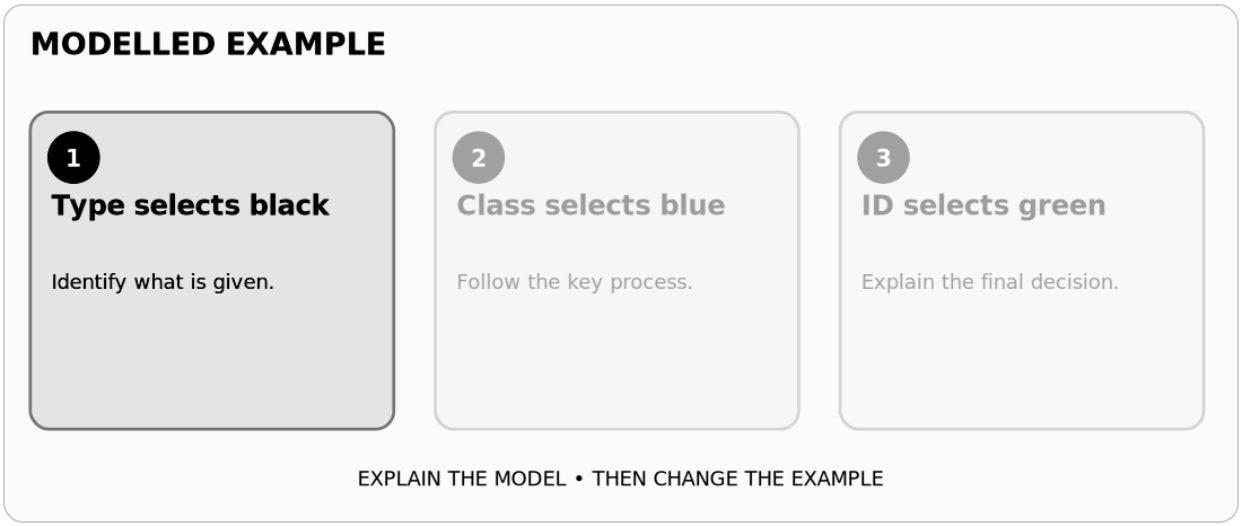

Green: matching ID selector generally outranks the class and element selectors where origin, importance and layers are equal.

I Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

p{color:black}, .notice{color:blue}, #flag{color:green} all match one element. Which colour?

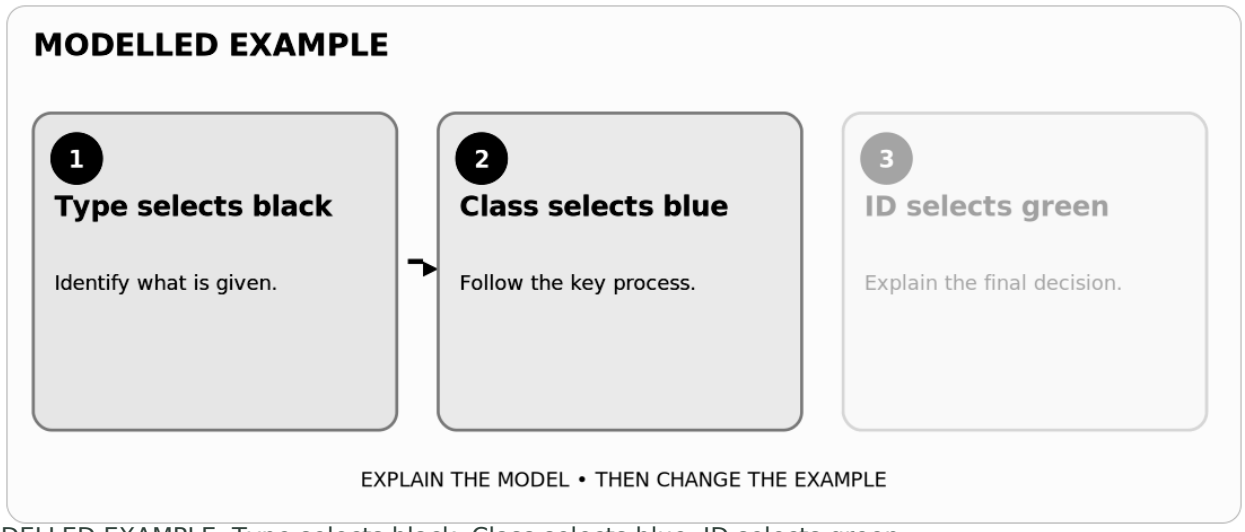

Identify the input or diagram and predict the first result.

MODELLED EXAMPLE: Type selects black, Class selects blue, ID selects green

p{color:black}, .notice{color:blue}, #flag{color:green} all match one element. Which colour?

Identify the input or diagram and predict the first result.

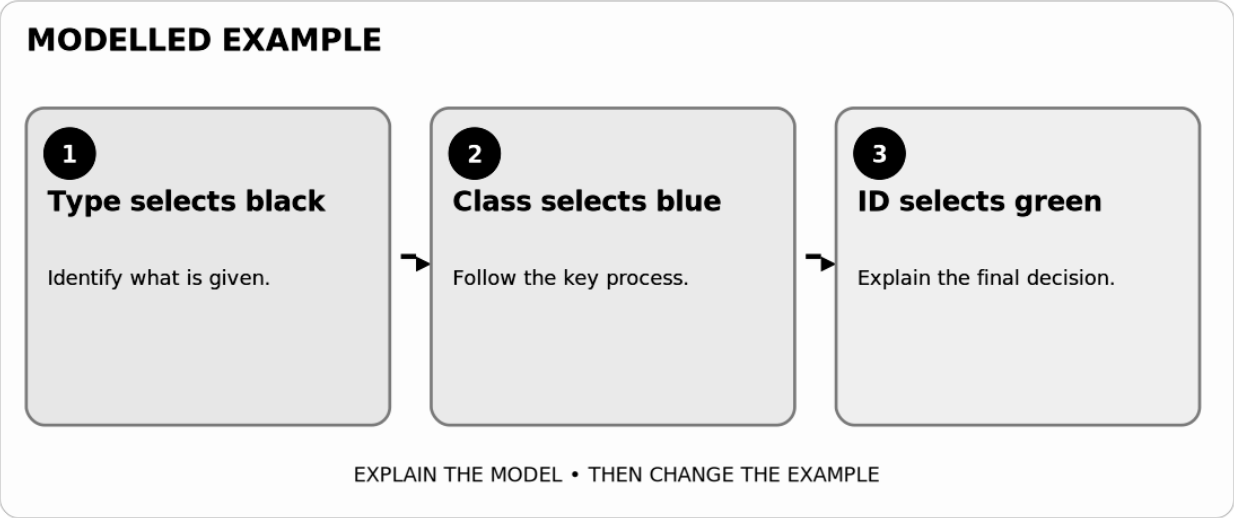

MODELLED EXAMPLE: Type selects black, Class selects blue, ID selects green

WE DO — GUIDED PRACTICE

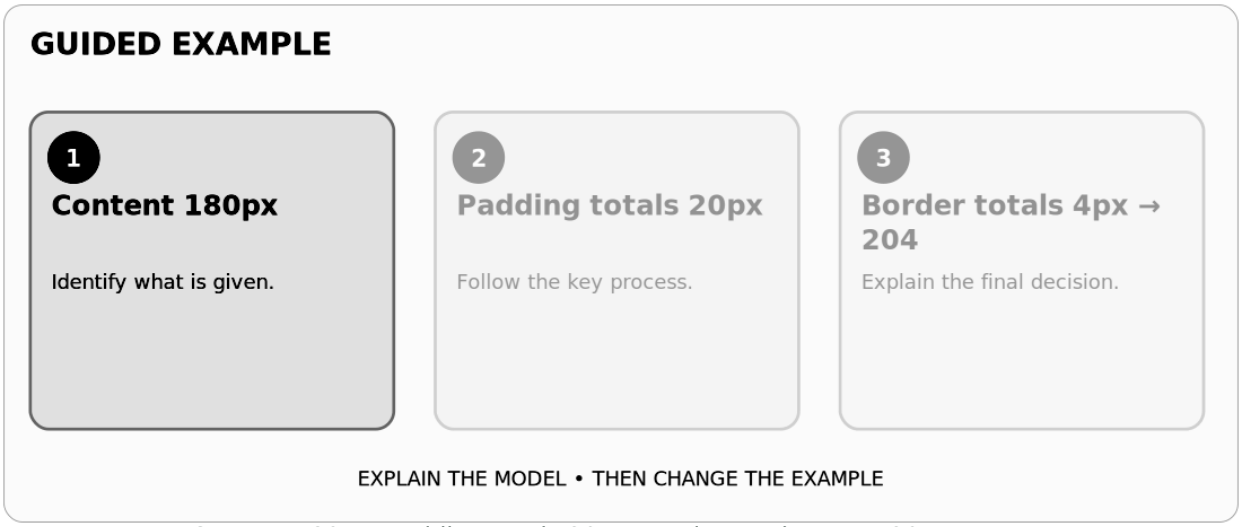

Try → Discuss → Improve

We Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

A content-box element has width 180px, horizontal padding 10px each side and 2px border each side. Total outer

Identify the input or diagram and predict the first result.

GUIDED EXAMPLE: Content 180px, Padding totals 20px, Border totals 4px → 204

WE DO — TRY · DISCUSS · IMPROVE

TRY: Use the original guided questions and diagrams in the preceding We Do pages. DISCUSS: Explain and challenge methods before independent practice. IMPROVE: Note one change now; compare with the source model only AFTER the Exit Ticket.

Guided 1: Content 180px Identify the input or diagram and predict the first result.

DISCUSS — Compare your methods. Justify one important decision, identify one difference, and agree a specific improvement.

IMPROVE — Write one precise correction or stronger explanation in your own answer.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 1

Write CSS to make h2 navy and .key items bold. [4]

Question 2

Explain relative specificity of p, .intro and #intro when all match an element. [6]

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 3

A content-box panel is 240px with 12px horizontal padding, 3px borders and 8px margins on both sides. Calculate overall space and compare border-box. [8]

EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

An ID selector generally has higher specificity than a simple element selector.

How confident are you? Circle one: Confident / Getting there / Need help

Explain your choice, identifying one concept you can now use independently.

GREEN PEN — Correct and explain

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

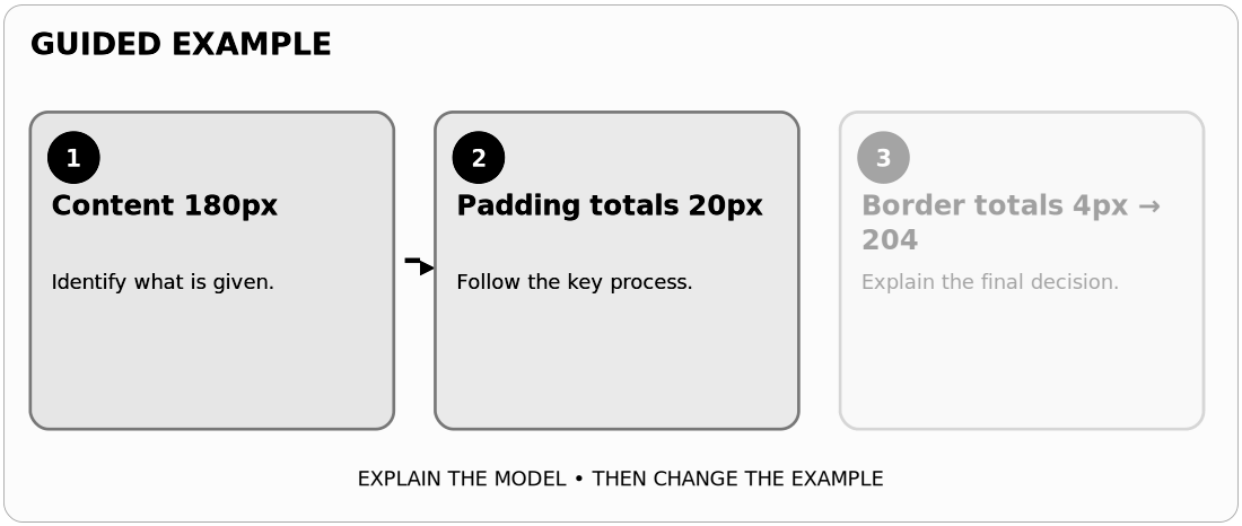

Next step: revisit the model or a relevant revision-guide section if needed.

We Do Check · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

A content-box element has width 180px, horizontal padding 10px each side and 2px border each side. Total outer

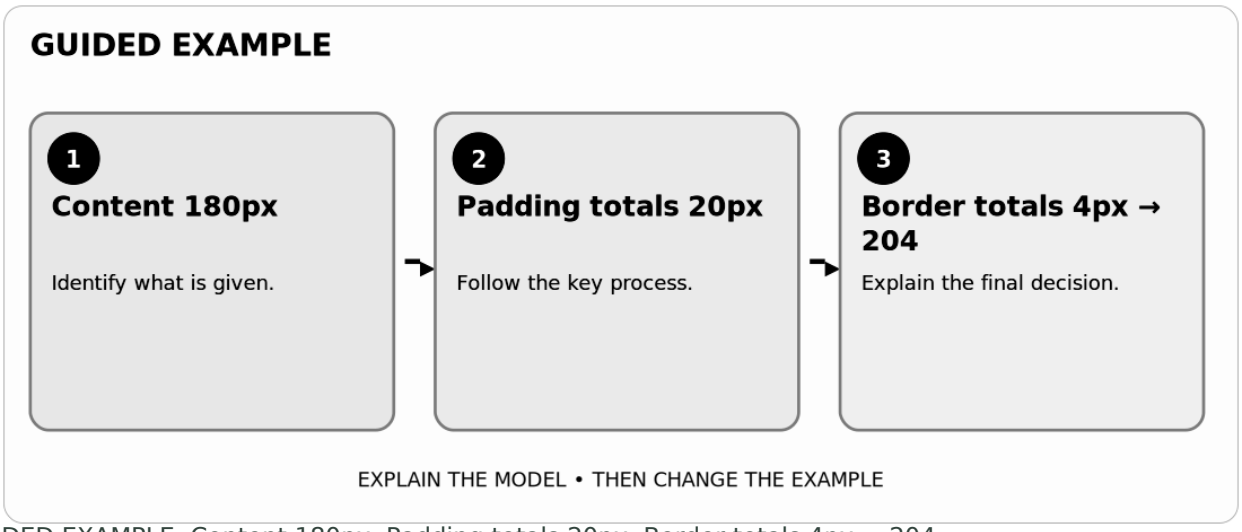

Identify the input or diagram and predict the first result.

GUIDED EXAMPLE: Content 180px, Padding totals 20px, Border totals 4px → 204

A content-box element has width 180px, horizontal padding 10px each side and 2px border each side. Total outer

Identify the input or diagram and predict the first result.

GUIDED EXAMPLE: Content 180px, Padding totals 20px, Border totals 4px → 204

WE DO — SOURCE CHECK / IMPROVE

Only use this section AFTER attempting the We Do, You Do and Exit Ticket. Compare with the original classroom lesson's CHECK explanation. Correct errors in GREEN PEN and explain why.

Guided 1 — original CHECK

Padding totals 20px

Follow the second stage and explain its importance.

Border totals 4px → 204

180 + 20 + 4 = 204px. Margins would add extra occupied space. With border-box sizing, declared width includes padding and border.

IMPROVE: Explain one correction to your own reasoning.
