DO NOW — RECALL

Lesson 158 · Computer Misuse Act 1990: Permission and

Name: _____ Class: _____ Date: _____

1. What UK legislation replaced the Data Protection Act 1998?

2. What is the worst-case order of binary search?

3. What is referential integrity?

4. What is the purpose of an operating system's memory management?

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

The Data Protection Act 2018 (alongside UK GDPR).

2. Model answer

O(log n) on sorted random-access data.

3. Model answer

Foreign keys refer to valid parent keys, subject to allowed NULL/policies.

4. Model answer

Allocating and protecting memory for running programs.

By the end, you can…

• Section 1 concerns knowing unauthorised access to computer material.

• Section 2 concerns unauthorised access intending to commit/facilitate further offences.

• Section 3 addresses unauthorised acts impairing operation/data, or reckless impairment.

Vocabulary — know these terms

unauthorised access — Access without the required permission.

section 1 — Knowing unauthorised access to computer material.

section 2 — Unauthorised access intending to commit or facilitate another offence.

section 3 — Unauthorised acts intending or recklessly causing impairment.

NEW LEARNING

Read, annotate and explain

Unauthorised access

Section 1 concerns knowing unauthorised access to computer material.

Further criminal intent

Section 2 concerns unauthorised access intending to commit/facilitate further offences.

Impairment

Section 3 addresses unauthorised acts impairing operation/data, or reckless impairment.

Explain one step in your own words, using the correct technical terms.

New Learning · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

New Learning

Computer Misuse Act 1990: Permission and Offences: Access without permission, Further offence, System damage

New Learning

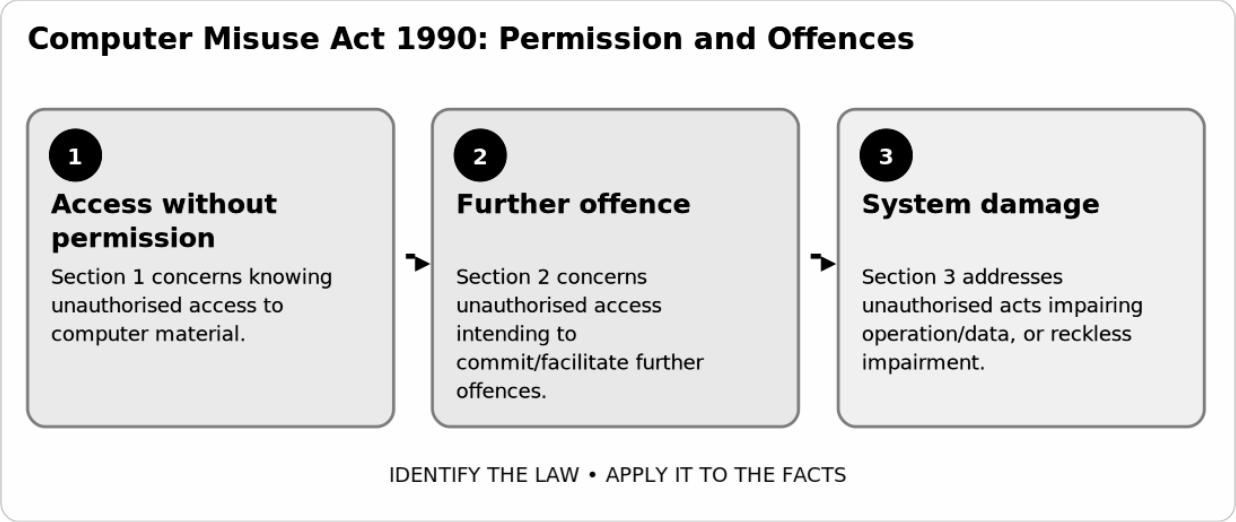

Computer Misuse Act 1990: Permission and Offences: Access without permission, Further offence, System damage

I DO — WORKED EXAMPLE

Follow the worked method

A pupil correctly guesses a teacher's password, then signs in to view private records despite knowing permission is absent. Which offence may apply?

Password discovered

Identify the relevant facts, purpose and authority.

Login not authorised

Discuss which law or safeguard fits the situation.

Section 1 risk

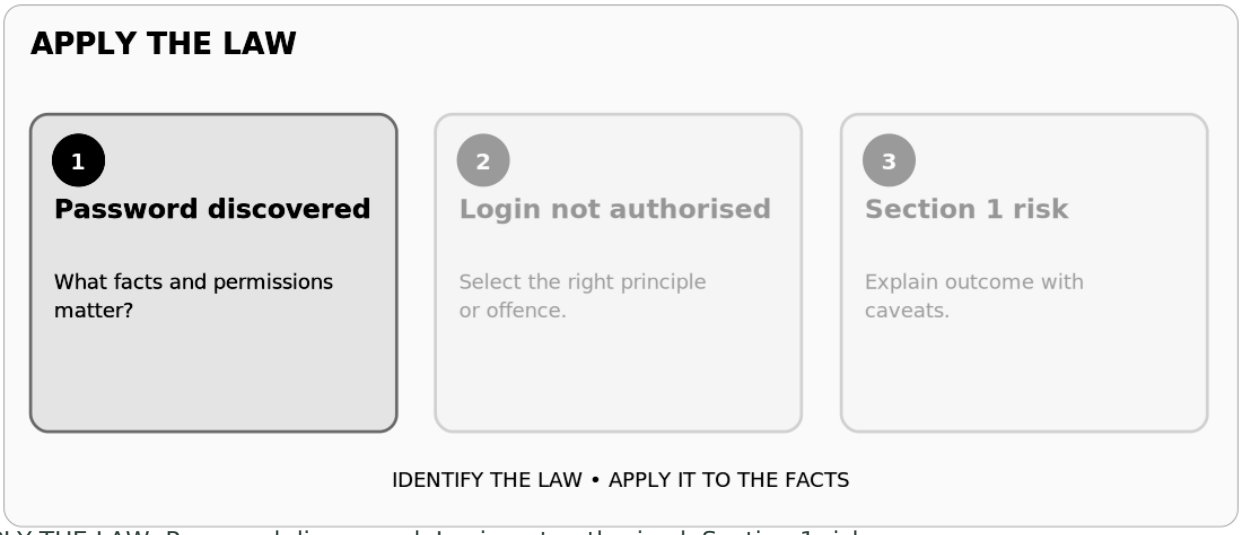

Section 1 can apply to knowing unauthorised access even if no data is changed. The correct password does not supply authorisation. Additional offences depend on intent and conduct; do not assume every access is a section 2 offence.

I Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

A pupil correctly guesses a teacher's password, then signs in to view private records despite knowing permissi

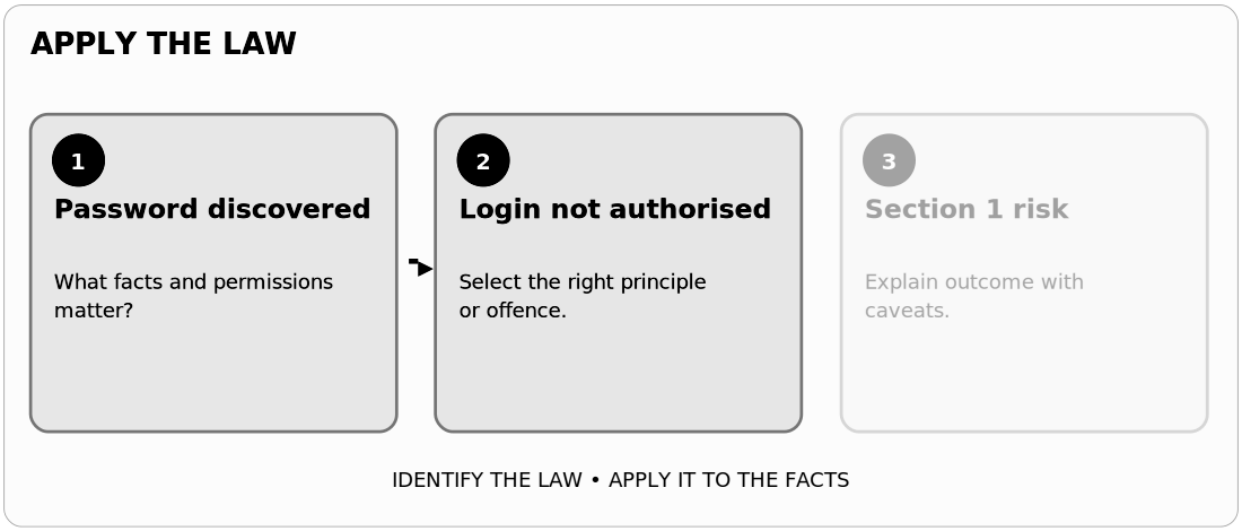

Identify the relevant facts, purpose and authority.

APPLY THE LAW: Password discovered, Login not authorised, Section 1 risk

A pupil correctly guesses a teacher's password, then signs in to view private records despite knowing permissi

Identify the relevant facts, purpose and authority.

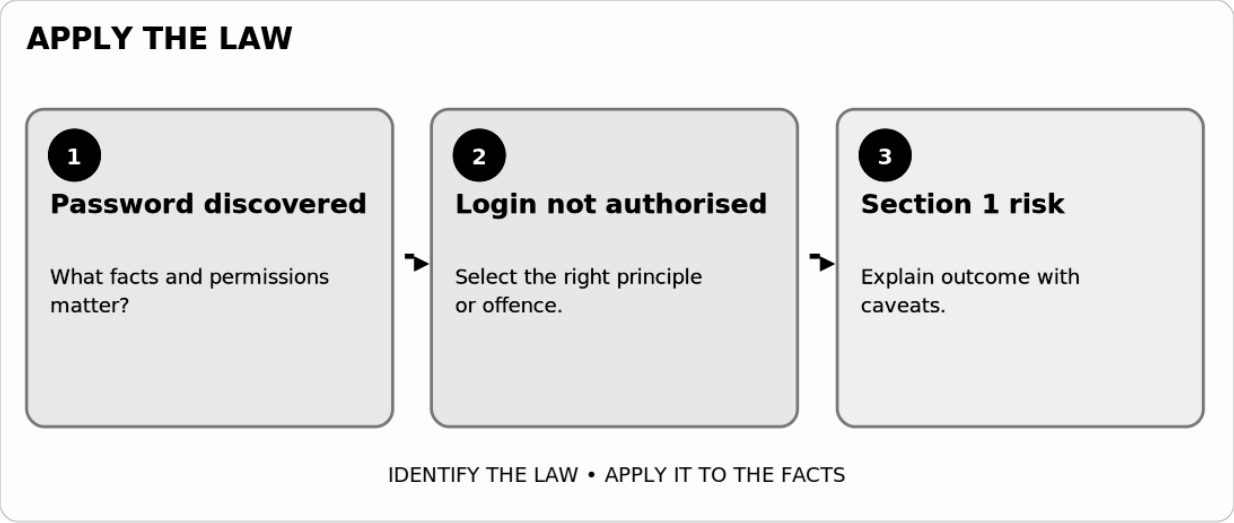

APPLY THE LAW: Password discovered, Login not authorised, Section 1 risk

I Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

A pupil correctly guesses a teacher's password, then signs in to view private records despite knowing permissi

Identify the relevant facts, purpose and authority.

APPLY THE LAW: Password discovered, Login not authorised, Section 1 risk

WE DO — GUIDED PRACTICE

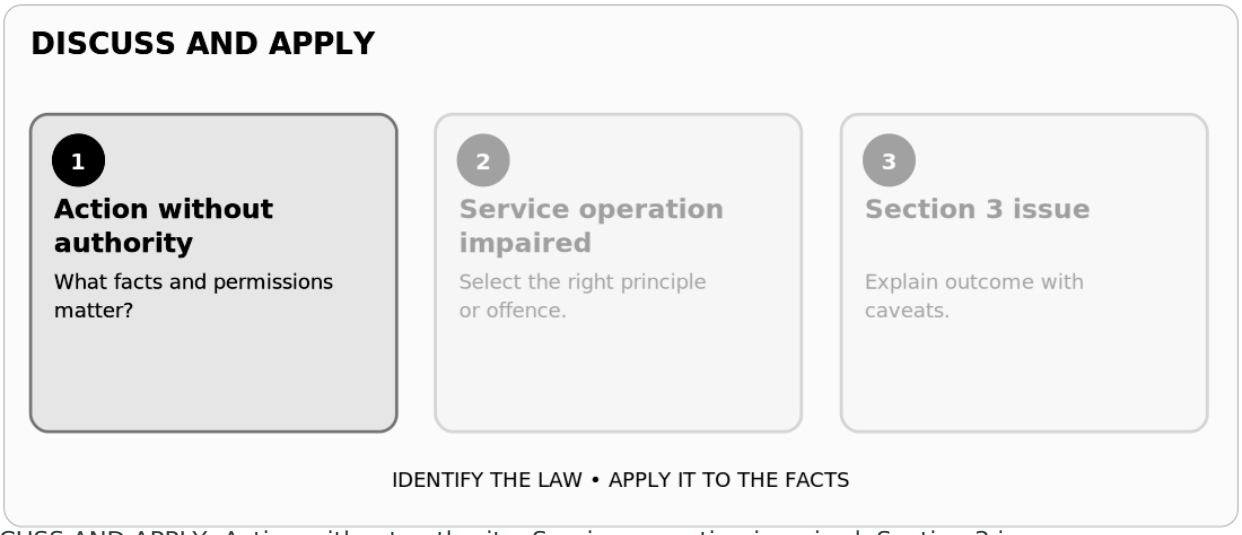

Try → Discuss → Improve

We Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

An employee, without authority, deliberately launches an action intended to disable a school server. Which iss

Identify the relevant facts, purpose and authority.

DISCUSS AND APPLY: Action without authority, Service operation impaired, Section 3 issue

WE DO — TRY · DISCUSS · IMPROVE

TRY: Use the original guided questions and diagrams in the preceding We Do pages. DISCUSS: Explain and challenge methods before independent practice. IMPROVE: Note one change now; compare with the source model only AFTER the Exit Ticket.

Guided 1: Action without authority Identify the relevant facts, purpose and authority.

DISCUSS — Compare your methods. Justify one important decision, identify one difference, and agree a specific improvement.

IMPROVE — Write one precise correction or stronger explanation in your own answer.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 1

Explain the distinction between knowing unauthorised access and access with further criminal intent. [6]

Question 2

A pupil logs into a friend's account without permission but changes nothing. Explain whether absence of damage guarantees legality. [6]

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 3

Compare three cases: unauthorised account entry, entry to facilitate fraud, and deliberately disabling a network service. Relate to sections 1, 2, 3. [8]

EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

Knowing a valid password always makes access legally authorised.

How confident are you? Circle one: Confident / Getting there / Need help

Explain your choice, identifying one concept you can now use independently.

GREEN PEN — Correct and explain

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

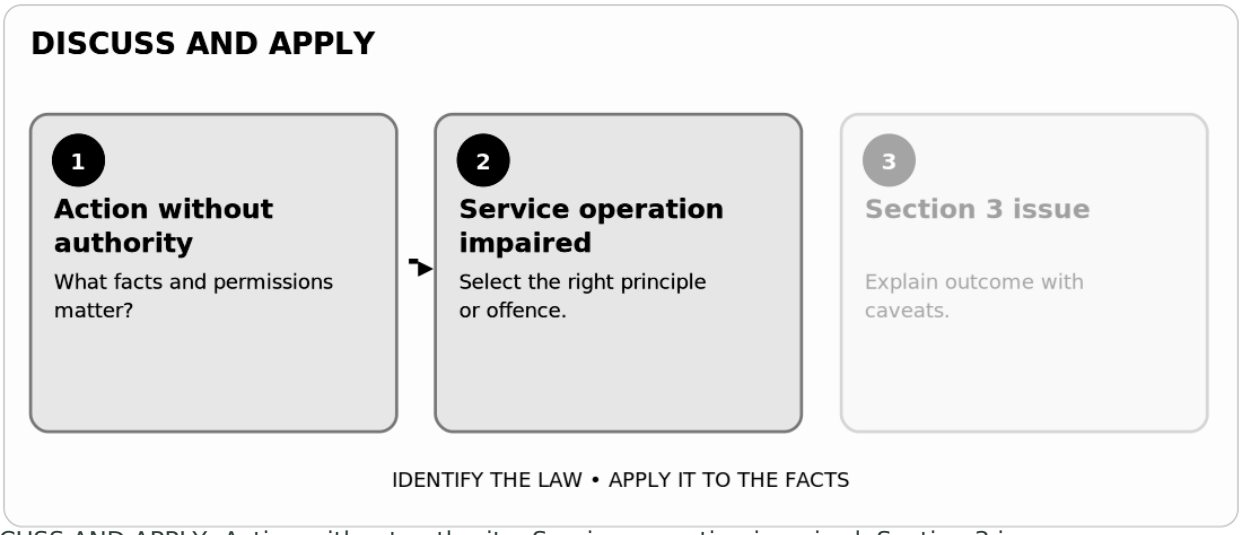

Next step: revisit the model or a relevant revision-guide section if needed.

We Do Check · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

An employee, without authority, deliberately launches an action intended to disable a school server. Which iss

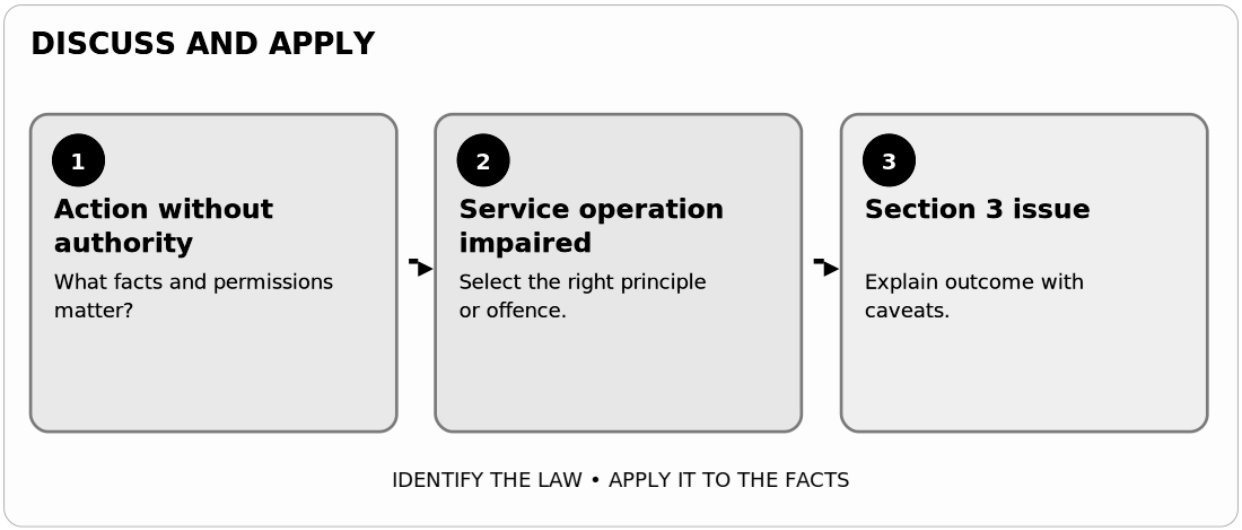

Identify the relevant facts, purpose and authority.

DISCUSS AND APPLY: Action without authority, Service operation impaired, Section 3 issue

An employee, without authority, deliberately launches an action intended to disable a school server. Which iss

Identify the relevant facts, purpose and authority.

DISCUSS AND APPLY: Action without authority, Service operation impaired, Section 3 issue

WE DO — SOURCE CHECK / IMPROVE

Only use this section AFTER attempting the We Do, You Do and Exit Ticket. Compare with the original classroom lesson's CHECK explanation. Correct errors in GREEN PEN and explain why.

Guided 1 — original CHECK

Service operation impaired

Discuss which law or safeguard fits the situation.

Section 3 issue

Section 3 concerns unauthorised acts intended to impair computer operation, or reckless impairment. Evidence of deliberate disruption distinguishes this from merely accessing a file. Serious-damage provisions may apply to particularly grave cases.

IMPROVE: Explain one correction to your own reasoning.
