WE DO — SOURCE CHECK / IMPROVE

Only use this section AFTER attempting the We Do, You Do and Exit Ticket. Compare with the original classroom lesson's CHECK explanation. Correct errors in GREEN PEN and explain why.

Guided 1 — original CHECK

Read conditions

Discuss which law or safeguard fits the situation.

Retain notices as required

A permissive licence may allow use/modification/distribution subject to its terms, generally keeping the copyright/licence notice. Check the exact code's licence and third-party dependencies rather than assuming all free online code is unrestricted.

IMPROVE: Explain one correction to your own reasoning.

DO NOW — RECALL

Lesson 159 · Copyright, Designs and Patents Act 1988: C

Name: _____ Class: _____ Date: _____

1. What matters more than having a valid password under the Computer Misuse Act?

2. What is referential integrity?

3. Why does the TLS padlock not guarantee a site is honest?

4. What is the worst-case order of binary search?

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

Actual authorisation to access the resource.

2. Model answer

Foreign keys refer to valid parent keys, subject to allowed NULL/policies.

3. Model answer

Encryption in transit does not establish trustworthiness of operator.

4. Model answer

O(log n) on sorted random-access data.

By the end, you can…

• Original software code, images, text and music can attract copyright automatically.

• Licence terms, ownership and limited exceptions determine permitted copying and reuse.

• Respect allowed distribution, modification, attribution and restrictions.

Vocabulary — know these terms

copyright — Legal protection for original expression including software code and images.

licence — Permission defining use and distribution conditions.

attribution — Credit to creator, distinct from reproduction permission.

fair dealing — Specific limited UK copyright exceptions with applicable conditions.

We Do Check · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

A developer discovers code labelled MIT Licence and wants to reuse it in a new app. What must they check?

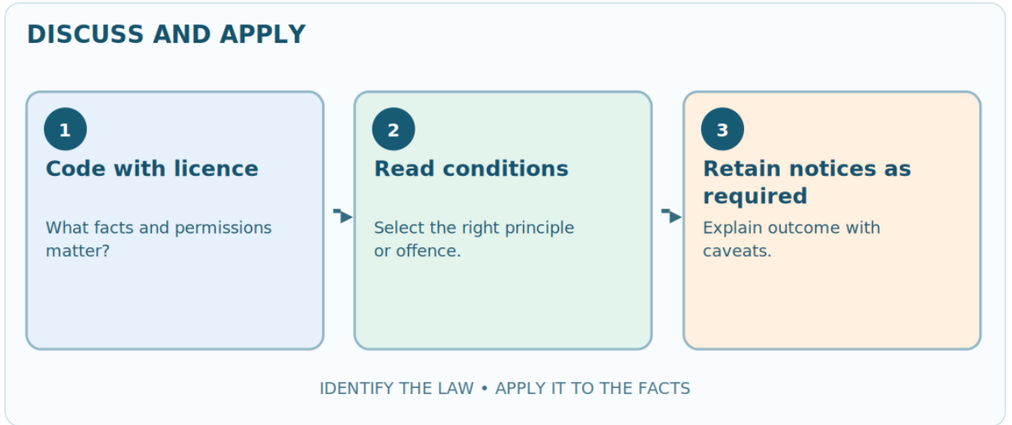

Identify the relevant facts, purpose and authority.

DISCUSS AND APPLY: Code with licence, Read conditions, Retain notices as required

A developer discovers code labelled MIT Licence and wants to reuse it in a new app. What must they check?

Identify the relevant facts, purpose and authority.

DISCUSS AND APPLY: Code with licence, Read conditions, Retain notices as required

EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

Any copyrighted image can be republished legally if the creator's name is shown.

How confident are you? Circle one: Confident / Getting there / Need help

Explain your choice, identifying one concept you can now use independently.

GREEN PEN — Correct and explain

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

Next step: revisit the model or a relevant revision-guide section if needed.

NEW LEARNING

Read, annotate and explain

Identify protected work

Original software code, images, text and music can attract copyright automatically.

Check permission

Licence terms, ownership and limited exceptions determine permitted copying and reuse.

Use responsibly

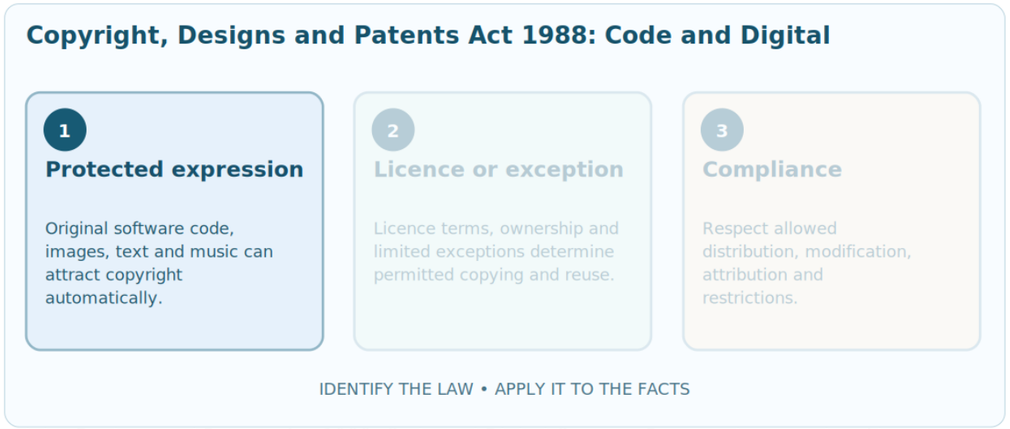

Respect allowed distribution, modification, attribution and restrictions.

Explain one step in your own words, using the correct technical terms.

Copyright, Designs and Patents Act 1988: Code and Digital Content: Protected expression, Licence or exception, Compliance

New Learning

Copyright, Designs and Patents Act 1988: Code and Digital Content: Protected expression, Licence or exception, Compliance

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 3

A student wants to publish a free revision site with online diagrams, quoted textbook paragraphs and open-source sample code. Evaluate three permission routes. [8]

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 1

Describe two types of digital work protected by copyright, and one typical right holder control. [6]

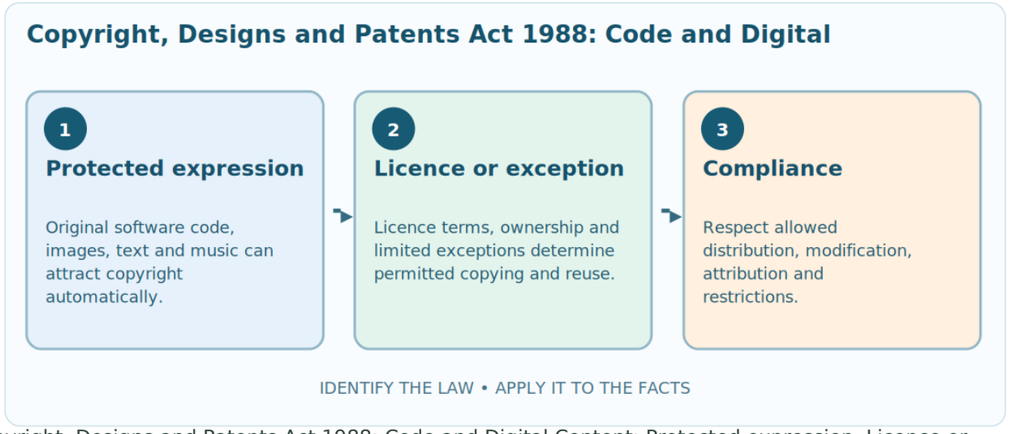

Question 2

Explain why adding an acknowledgement does not necessarily permit publication of a copyrighted photograph. [6]

New Learning

Copyright, Designs and Patents Act 1988: Code and Digital Content: Protected expression, Licence or exception, Compliance

I DO — WORKED EXAMPLE

Follow the worked method

A pupil copies an online graphic into a public school website, includes the photographer's name but has no permission. Is attribution enough?

Protected image

Identify the relevant facts, purpose and authority.

Attribution only

Discuss which law or safeguard fits the situation.

Check licence/permission

Not generally. Crediting the creator is good practice but does not itself grant permission. Check the licence or applicable limited exception before publicly reproducing the image; choose licensed/own work if uncertain.

WE DO — TRY · DISCUSS · IMPROVE

TRY: Use the original guided questions and diagrams in the preceding We Do pages. DISCUSS: Explain and challenge methods before independent practice. IMPROVE: Note one change now; compare with the source model only AFTER the Exit Ticket.

Guided 1: Code with licence Identify the relevant facts, purpose and authority.

DISCUSS — Compare approaches, walk through one test input, and explain how you would detect or correct a mistake.

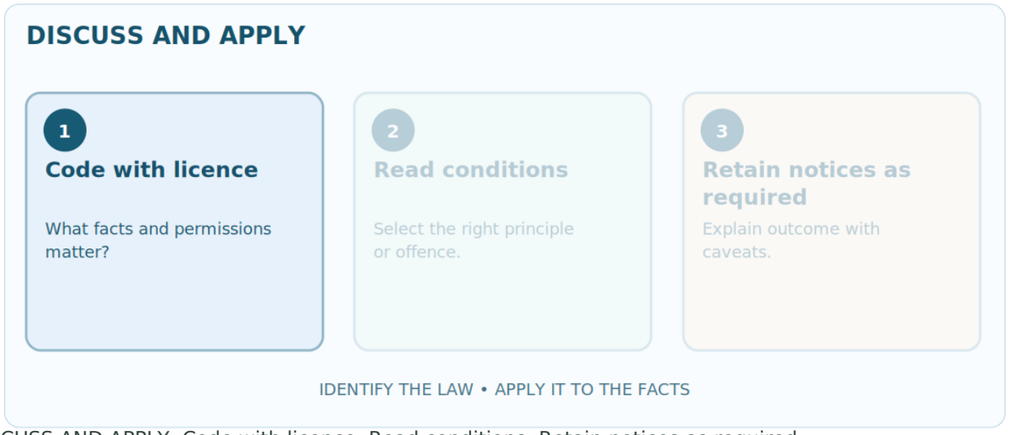

IMPROVE — Write one precise correction or stronger explanation in your own answer.
