STAFF REVIEW · H446 046 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Initialising an object's state.

2. It cannot be accessed directly from outside the class.

3. Zero.

4. 1, 1, 0. Q samples D only at each rising edge and holds its value between those edges.

I Do — source worked steps

1. Trace and justify — Index 0 refers to the first object; its Title is Ada.

We Do — guided CHECK

1. Trace and justify
Index 1 refers to the second object. The property update changes its Title; output is Updated.

You Do — source mark schemes

1. Holes [2]; 0-based index 1 selects second element and its Title [2].

2. Book[] b={new Book{Title="A"},new Book{Title="B"}}; [4] Console.WriteLine(b[0].Title); [2], assuming Book declares Title property.

3. Both elements hold references [2] to same instance [2]; mutation visible through either reference [2]; this is aliasing, not array-index copying.

Exit Ticket — source answer

1. True. Both can point to the same instance.
