DO NOW — RECALL

Applications, utilities and source licensing

Name: _____ Class: _____ Date: _____

1. What is a hypervisor?

2. Why is a driver required?

3. Define a utility.

4. Full adder inputs 1,1,1: what are sum and carry-out?

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

Manages guest VMs.

2. Model answer

Provides OS-to-hardware interface.

3. Model answer

Software that maintains, protects or manages the system.

4. Model answer

$1+1+1=3=11_2$, hence sum1, carry1.

Vocabulary — know these terms

application — End-user task software.

utility — System-management program.

open-source — Qualifying source-available licence.

licence — Conditions for use and distribution.

NEW LEARNING

Read, annotate and explain

Understand

Application software provides end-user capabilities; utilities perform system maintenance, protection or management.

Trace

Open-source means qualifying licences grant rights to inspect, change and redistribute source code under terms.

Evaluate

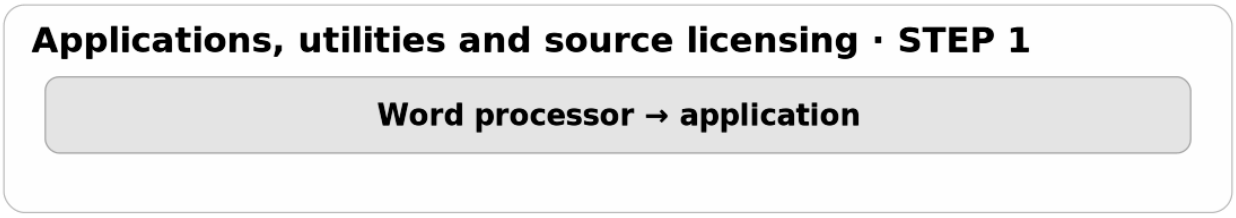

Proprietary licensing can restrict modification. Compare cost, support, compatibility, accessibility and staff skills.

Explain one step in your own words, using the correct technical terms.

New Learning · original lesson diagrams

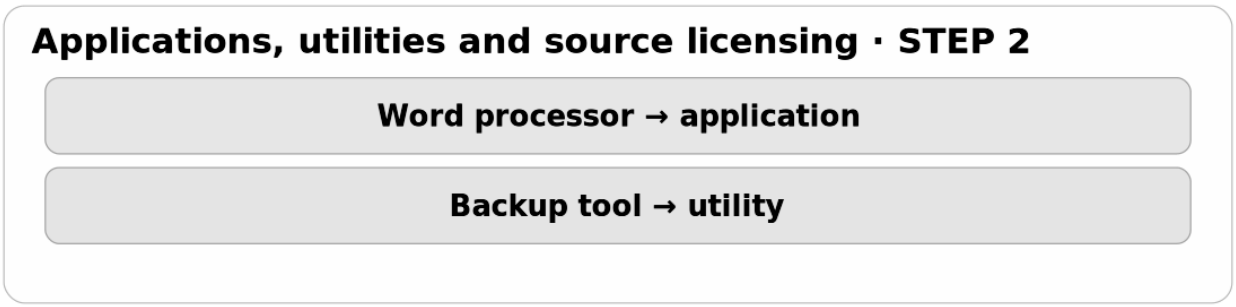

Diagrams appear after the related explanation. Annotate the original source visual.

Applications, utilities and source licensing · STEP 4

I DO — WORKED EXAMPLE

Follow the worked method

Select software to write a report and protect copies.

Predict first

A user task and system-protection task call for different software classes.

Model and check

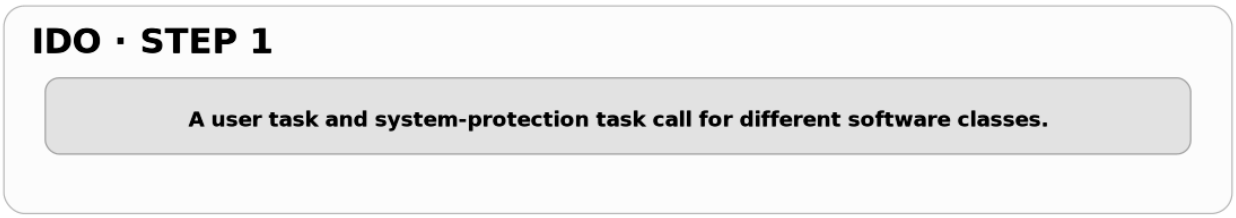

Explain why each value follows from the earlier step.

I Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

Select software to write a report and protect copies.

A user task and system-protection task call for different software classes.

IDO · STEP 1

Select software to write a report and protect copies.

A user task and system-protection task call for different software classes.

IDO · STEP 2

WE DO — GUIDED PRACTICE

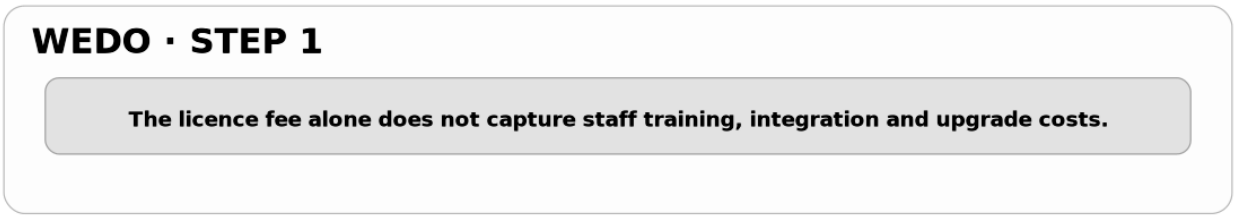

Try → Discuss → Improve

We Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

School compares open-source and proprietary databases. What matters beyond price?

The licence fee alone does not capture staff training, integration and upgrade costs.

WEDO · STEP 1

WE DO — TRY · DISCUSS · IMPROVE

TRY: Use the original guided questions and diagrams in the preceding We Do pages. DISCUSS: Explain and challenge methods before independent practice. IMPROVE: Note one change now; compare with the source model only AFTER the Exit Ticket.

Guided 1: Predict first The licence fee alone does not capture staff training, integration and upgrade costs.

DISCUSS — Compare your methods. Justify one important decision, identify one difference, and agree a specific improvement.

IMPROVE — Write one precise correction or stronger explanation in your own answer.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 1

Classify spreadsheet, backup, photo editor and disk cleanup. [4]

Question 2

Compare open and closed-source distribution and give one benefit of each. [6]

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 3

Evaluate changing school software from proprietary to open-source. [6]

EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

Source code posted online automatically gives unrestricted modification rights.

How confident are you? Circle one: Confident / Getting there / Need help

Explain your choice, identifying one concept you can now use independently.

GREEN PEN — Correct and explain

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

Next step: revisit the model or a relevant revision-guide section if needed.

We Do Check · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

School compares open-source and proprietary databases. What matters beyond price?

The licence fee alone does not capture staff training, integration and upgrade costs.

WEDO · STEP 2

WE DO — SOURCE CHECK / IMPROVE

Only use this section AFTER attempting the We Do, You Do and Exit Ticket. Compare with the original classroom lesson's CHECK explanation. Correct errors in GREEN PEN and explain why.

Guided 1 — original CHECK

Model and check

Explain why each value follows from the earlier step.

IMPROVE: Explain one correction to your own reasoning.
