DO NOW — RECALL

# Databases, SQL and web code practice

Name: _____ Class: _____ Date: _____

**1. What does INNER JOIN require?**

**2. What is a foreign key?**

**3. How does label for connect to input?**

**4. Zero-indexed 4×3 array: total values and last index pair.**

**DO NOW — CHECK / OBJECTIVES**

# Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

### 1. Model answer

Join condition matching rows.

### 2. Model answer

Field referencing key in a related table.

### 3. Model answer

It matches the input id attribute.

### 4. Model answer

12 values, last index (3,2).

### By the end, you can…

• A primary key identifies rows; a foreign key creates the relationship across tables.

• An INNER JOIN returns matching rows; a WHERE clause then filters them.

• HTML structures user forms, CSS styles them, and JS can respond to events. Server-side checks remain authoritative.

### Vocabulary — know these terms

join — Match rows across tables.

foreign key — Key relationship across tables.

label — Accessible form control description.

textContent — DOM text-setting property.

NEW LEARNING

# Read, annotate and explain

### Understand

A primary key identifies rows; a foreign key creates the relationship across tables.

### Apply

An INNER JOIN returns matching rows; a WHERE clause then filters them.

### Evaluate

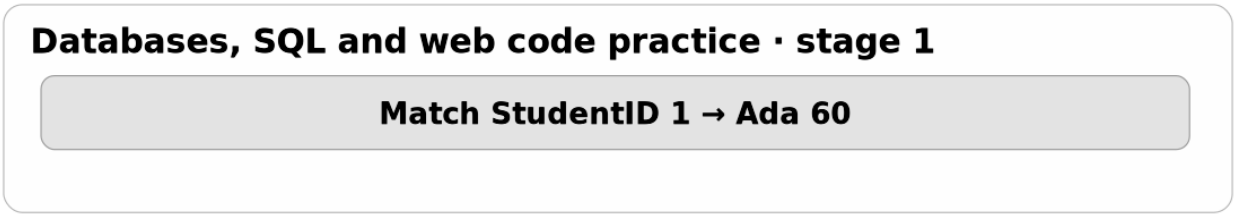

HTML structures user forms, CSS styles them, and JS can respond to events. Server-side checks remain authoritative.

**Explain one step in your own words, using the correct technical terms.**

# New Learning · original lesson diagrams

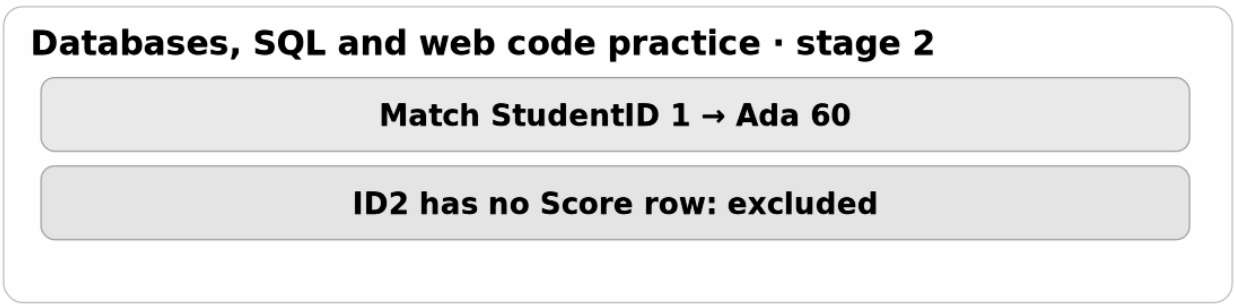

Diagrams appear after the related explanation. Annotate the original source visual.

### New Learning

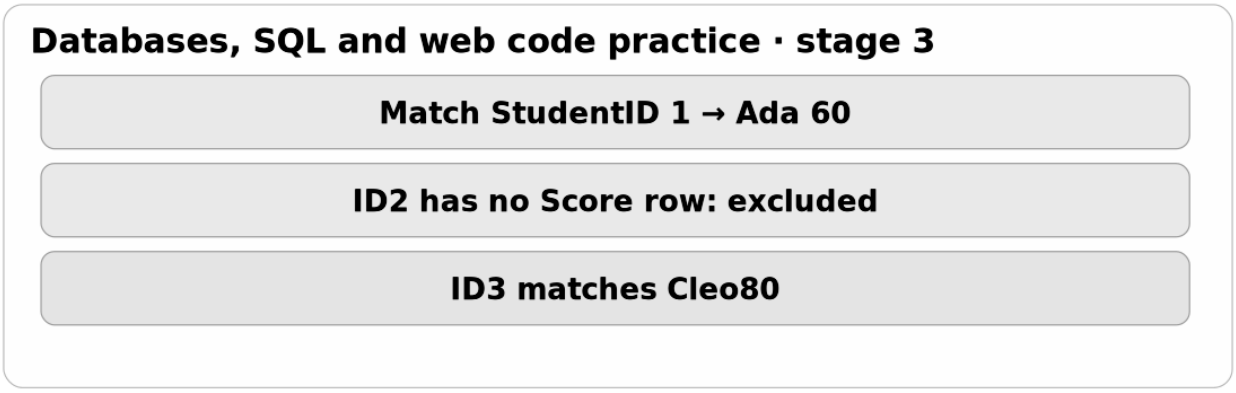

Databases, SQL and web code practice · stage 1: Match StudentID 1 → Ada 60

### New Learning

Databases, SQL and web code practice · stage 2: Match StudentID 1 → Ada 60; ID2 has no Score row: excluded

### New Learning

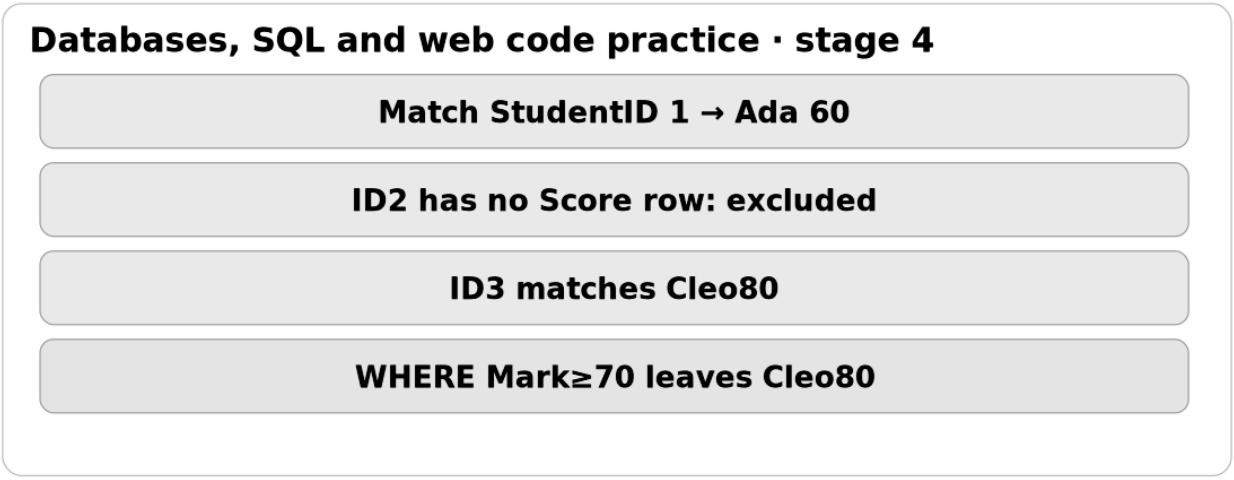

Databases, SQL and web code practice · stage 3: Match StudentID 1 → Ada 60; ID2 has no Score row: excluded; ID3 matches Cleo80

# New Learning · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

### New Learning

Databases, SQL and web code practice · stage 4: Match StudentID 1 → Ada 60; ID2 has no Score row: excluded; ID3 matches Cleo80; WHERE Mark≥70 leaves Cleo80

I DO — WORKED EXAMPLE

# Follow the worked method

**Write a form label correctly associated with email input.**

**Predict first**

Matching for and id improves accessibility, while name defines the submitted field.

**Explain and check**

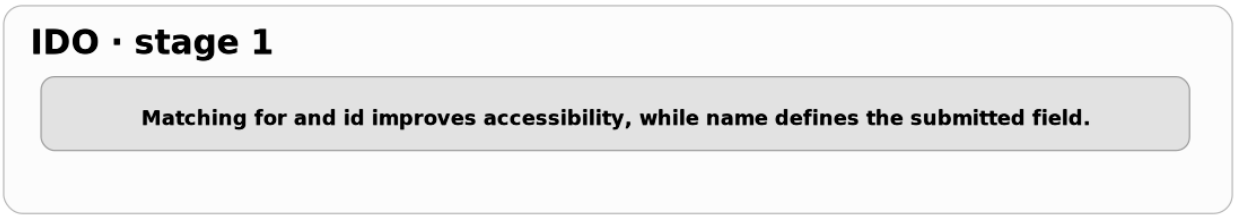

Explain the reason for the result.

# I Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

### Write a form label correctly associated with email input.

Matching for and id improves accessibility, while name defines the submitted field.

IDO · stage 1: Matching for and id improves accessibility, while name defines the submitted field.

### Write a form label correctly associated with email input.

Matching for and id improves accessibility, while name defines the submitted field.

IDO · stage 2: Matching for and id improves accessibility, while name defines the submitted field.; Explain the reason for the result.

WE DO — GUIDED PRACTICE

# Try → Discuss → Improve

# We Do · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

### Write JavaScript to set the paragraph id='status' to 'Saved'.

textContent inserts safe text without parsing markup.

WEDO · stage 1: textContent inserts safe text without parsing markup.

# WE DO — TRY · DISCUSS · IMPROVE

TRY: Use the original guided questions and diagrams in the preceding We Do pages. DISCUSS: Explain and challenge methods before independent practice. IMPROVE: Note one change now; compare with the source model only AFTER the Exit Ticket.

### Guided 1: Predict first textContent inserts safe text without parsing markup.

DISCUSS — Compare your methods. Justify one important decision, identify one difference, and agree a specific improvement.

IMPROVE — Write one precise correction or stronger explanation in your own answer.

---

YOU DO — INDEPENDENT PRACTICE

# Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

### Question 1

Trace SQL JOIN and WHERE in the lesson example; identify final row and excluded rows. [6]

### Question 2

Write SQL selecting names with marks≥70 using the two-table design. [6]

YOU DO — INDEPENDENT PRACTICE

# Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

### Question 3

Explain why a form's browser validation cannot be the sole protection for a school database, including one safe server procedure. [6]

EXIT TICKET / REFLECTION

# Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

**A client-side HTML required field makes server-side validation unnecessary.**

**How confident are you? Circle one: Confident / Getting there / Need help**

Explain your choice, identifying one concept you can now use independently.

**GREEN PEN — Correct and explain**

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

Next step: revisit the model or a relevant revision-guide section if needed.

# We Do Check · original lesson diagrams

Diagrams appear after the related explanation. Annotate the original source visual.

### Write JavaScript to set the paragraph id='status' to 'Saved'.

textContent inserts safe text without parsing markup.

WEDO · stage 2: textContent inserts safe text without parsing markup.; Explain the reason for the result.

# WE DO — SOURCE CHECK / IMPROVE

Only use this section AFTER attempting the We Do, You Do and Exit Ticket. Compare with the original classroom lesson's CHECK explanation. Correct errors in GREEN PEN and explain why.

### Guided 1 — original CHECK

Explain and check

Explain the reason for the result.

IMPROVE: Explain one correction to your own reasoning.
