I Do · Read new knowledge

Key vocabulary

unauthorised access — Access without the required permission.

section 1 — Knowing unauthorised access to computer material.

section 2 — Unauthorised access intending to commit or facilitate another offence.

section 3 — Unauthorised acts intending or recklessly causing impairment.

New learning

Unauthorised access — Section 1 concerns knowing unauthorised access to computer material.

Further criminal intent — Section 2 concerns unauthorised access intending to commit/facilitate further offences.

Impairment — Section 3 addresses unauthorised acts impairing operation/data, or reckless impairment.

Worked example

A pupil correctly guesses a teacher's password, then signs in to view private records despite knowing permission is absent. Which offence may apply?

1. Password discovered — Identify the relevant facts, purpose and authority.

2. Login not authorised — Discuss which law or safeguard fits the situation.

3. Section 1 risk — Section 1 can apply to knowing unauthorised access even if no data is changed. The correct password does not supply authorisation. Additional offences depend on intent and conduct; do not assume every access is a section 2 offence.

We Do · Practise with guidance

An employee, without authority, deliberately launches an action intended to disable a school server. Which issue arises?

Action without authority

Identify the relevant facts, purpose and authority.

Service operation impaired

Discuss which law or safeguard fits the situation.

Section 3 issue

BLACK PEN Answer all questions first.

GREEN PEN Then: tick correct answers; rewrite mistakes.

Section 3 concerns unauthorised acts intended to impair computer operation, or reckless impairment. Evidence of deliberate disruption distinguishes this from merely accessing a file. Serious-damage provisions may apply to particularly grave cases.

BLACK PEN Answer all questions first. GREEN PEN Then: tick correct answers; rewrite mistakes.

You Do · Work independently

BLACK PEN: Write your own answers. Do not look at the Review & Improve pages yet.

Question 1

Explain the distinction between knowing unauthorised access and access with further criminal intent. [6]

Question 2

A pupil logs into a friend's account without permission but changes nothing. Explain whether absence of damage guarantees legality. [6]

Question 3

Compare three cases: unauthorised account entry, entry to facilitate fraud, and deliberately disabling a network service. Relate to sections 1, 2, 3. [8]

Exit Ticket · Answer before checking

Knowing a valid password always makes access legally authorised.

Page 1 onwards · Do Now

Q1. The Data Protection Act 2018 (alongside UK GDPR).

Q2. O(log n) on sorted random-access data.

Q3. Foreign keys refer to valid parent keys, subject to allowed NULL/policies.

Q4. Allocating and protecting memory for running programs.

You Do pages · Independent questions

Q1. Section 1 knowing unauthorised access [3], section 2 intent to commit/facilitate further offence [3].

Q2. No [2], section 1 can apply to access alone [2], knowledge of no permission matters [2].

Q3. Section 1 [2], section 2 further intent [2], section 3 impairment [2], necessary knowledge/authorisation and reasoned distinction [2].

Exit Ticket · Model answer

False. Authorisation comes from permission, not simply possession of credentials.
