I Do · Read new knowledge

Key vocabulary

copyright — Legal protection for original expression including software code and images.

licence — Permission defining use and distribution conditions.

attribution — Credit to creator, distinct from reproduction permission.

fair dealing — Specific limited UK copyright exceptions with applicable conditions.

New learning

Identify protected work — Original software code, images, text and music can attract copyright automatically.

Check permission — Licence terms, ownership and limited exceptions determine permitted copying and reuse.

Use responsibly — Respect allowed distribution, modification, attribution and restrictions.

Worked example

A pupil copies an online graphic into a public school website, includes the photographer's name but has no permission. Is attribution enough?

1. Protected image — Identify the relevant facts, purpose and authority.

2. Attribution only — Discuss which law or safeguard fits the situation.

3. Check licence/permission — Not generally. Crediting the creator is good practice but does not itself grant permission. Check the licence or applicable limited exception before publicly reproducing the image; choose licensed/own work if uncertain.

We Do · Practise with guidance

A developer discovers code labelled MIT Licence and wants to reuse it in a new app. What must they check?

Code with licence

Identify the relevant facts, purpose and authority.

Read conditions

Discuss which law or safeguard fits the situation.

Retain notices as required

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

A permissive licence may allow use/modification/distribution subject to its terms, generally keeping the copyright/licence notice. Check the exact code's licence and third-party dependencies rather than assuming all free online code is unrestricted.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

You Do · Work independently

BLACK PEN: Write your own answers. Do not look at the Review & Improve pages yet.

Question 1

Describe two types of digital work protected by copyright, and one typical right holder control. [6]

Question 2

Explain why adding an acknowledgement does not necessarily permit publication of a copyrighted photograph. [6]

Question 3

A student wants to publish a free revision site with online diagrams, quoted textbook paragraphs and open-source sample code. Evaluate three permission routes. [8]

Exit Ticket · Answer before checking

Any copyrighted image can be republished legally if the creator's name is shown.

Q1. Actual authorisation to access the resource.

Q2. Foreign keys refer to valid parent keys, subject to allowed NULL/policies.

Q3. Encryption in transit does not establish trustworthiness of operator.

Q4. O(log n) on sorted random-access data.

You Do pages · Independent questions

Q1. Software code/image/music/text examples [4], control copying/distribution/adaptation subject to exceptions [2].

Q2. Attribution distinct from permission [2], reproduction/public display rights [2], need licence, right-holder agreement or applicable exception [2].

Q3. Image licensing/permission [2], limited quotation/fair dealing subject to conditions [2], code licence compliance [2], contextual judgement on public distribution [2].

Exit Ticket · Model answer

False. Attribution alone does not confer copyright permission.

Try the question again

Choose one question you got wrong. All correct? Choose the hardest.
