BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

LESSON 142 · Legislation and Copyright

Name: _____ Class: _____ Date: _____

Time: _____ Teacher: _____

Work through the pages in order. Answer in BLACK PEN first. Check in GREEN PEN only after the Exit Ticket.

Do Now · Recall previous learning

Q1. Give a cultural impact of digital technology.

Q2. What does anti-malware detect?
A. Every future threat
B. Malicious software
C. All hardware faults
D. All weak passwords

Q3. “Every pupil needs full administrator rights for a secure network.” Correct this. Explain why.

Q4. A new printer will not work. “A printer driver only stores website passwords.” Correct this. How could the right driver help?

I Do · Read new knowledge

Key vocabulary

Data protection — Personal data must be handled lawfully, fairly and securely under applicable UK data-protection rules.

Computer Misuse Act — Unauthorised access and certain unauthorised acts involving computer systems are offences.

Copyright — Protects creators' original works against unauthorised copying and distribution, subject to exceptions/licences.

Licensing and scenario — Decisions must consider permissions, access rights and purpose rather than treating all digital copying as legal.

New learning

Data protection: Personal data must be handled lawfully, fairly and securely under applicable UK data-protection rules.

Computer Misuse Act: Unauthorised access and certain unauthorised acts involving computer systems are offences.

Copyright: Protects creators' original works against unauthorised copying and distribution, subject to exceptions/licences.

Licensing and scenario: Decisions must consider permissions, access rights and purpose rather than treating all digital copying as legal.

Worked example

A student copies a paid program onto every school laptop without permission. Identify the legal issue.

1. Identify software as copyright-protected work.

2. Explain licence terms may not permit copying/installation on additional machines.

3. Describe need for correct licences or permission.

4. Do not confuse copyright infringement with automatically being a Computer Misuse Act offence.

We Do · Practise with guidance

Guided 1

An employee accesses another person's account without permission. Identify law and rationale.

Worked method: State that knowing the password alone does not supply permission.

BLACK PEN Answer all questions first. GREEN PEN Then: tick correct answers; rewrite mistakes.

1. Copy the whole original question:

2. Write a complete new answer in GREEN PEN. Show working if needed:

BLACK PEN Answer all questions first. GREEN PEN Then: tick correct answers; rewrite mistakes.

You Do · Work independently

BLACK PEN: Write your own answers. Do not look at the Review & Improve pages yet.

Code First · Predict → Write → Test → Improve

Write the missing output when an optional personal-data field is unnecessary.

```
neededForService = false
if neededForService then
    print("Collect")
else
    ...
endif
```

write

Question 1

Name the UK law relevant to unauthorised access to a computer. [1 mark]

Question 2

Give one legal consideration when installing licensed software on many computers. [2 marks]

Question 3

Explain one principle of data protection for school pupil records. [3 marks]

BLACK PEN Answer all questions first. GREEN PEN Then: tick correct answers; rewrite mistakes.

Exit Ticket · Answer before checking

Knowing somebody's password automatically authorises access to their account.

BLACK PEN Answer all questions first. GREEN PEN Then: tick correct answers; rewrite mistakes.

Review & Improve · GREEN PEN

Now change to GREEN PEN. Find each original question. Tick correct answers; read the model and rewrite mistakes.

Page 1 onwards · Do Now

Q1. Digital communication can change language, access, traditions and how people take part in communities.

Q2. B — Malicious software

Q3. Give users only the access rights they need. This limits access without permission and possible damage.

Q4. A driver lets the OS communicate with and control a peripheral, such as a printer.

I Do / We Do pages · Guided practice

Q1. State that knowing the password alone does not supply permission.

You Do pages · Code First

```
neededForService = false
if neededForService then
    print("Collect")
else
    print("Do not collect")
endif
```

Expected result: Do not collect

You Do pages · Independent questions

Q1. Computer Misuse Act 1990.

Q2. Whether the licence permits the number and type of installations.

Q3. Collect/use for lawful specified purpose, minimise data and keep appropriately secure.

Exit Ticket · Model answer

False
