BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

LESSON 144 · Assessment Feedback and Target Setting

Name: _____ Class: _____ Date: _____

Time: _____ Teacher: _____

Work through the pages in order. Answer in BLACK PEN first. Check in GREEN PEN only after the Exit Ticket.

Do Now · Recall previous learning

Q1. Which law addresses unauthorised access to a computer system?

Q2. What can frequent device replacement increase?
A. Available raw materials
B. Battery life of old devices
C. Reuse of existing devices
D. Electronic waste

Q3. “Unauthorised access is lawful whenever the attacker does not delete files.” Correct this. Explain why.

Q4. A pupil uses a browser and editor at once. Staff and pupils need different access rights. Correct both claims. Explain why. (a) Each app needs its own CPU. (b) Every user needs full access.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

I Do · Read new knowledge

Key vocabulary

Classify errors — Separate knowledge gaps, misreading command words and calculation/algorithm mistakes.

Marking points — Award credit only for information that answers the question.

Correct at source — Redo the reasoning or trace, not only the final statement.

Retest learning — Attempt a different question on the same concept without relying on copied notes.

New learning

Classify errors: Separate knowledge gaps, misreading command words and calculation/algorithm mistakes.

Marking points: Award credit only for information that answers the question.

Correct at source: Redo the reasoning or trace, not only the final statement.

Retest learning: Attempt a different question on the same concept without relying on copied notes.

Worked example

A 4-mark answer says 'cache stores memory to make CPU faster'. Improve it.

1. State that cache holds frequently accessed data/instructions.

2. Explain faster access than main RAM.

3. Explain fewer slow memory accesses.

4. Connect to reduced CPU waiting and improved performance when accesses hit cache.

We Do · Practise with guidance

Guided 1

A network answer says 'the router sends all data everywhere'. Improve it.

Worked method: Compare with a switch forwarding frames on a LAN.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

2. Write a complete new answer in GREEN PEN. Show working if needed:

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

You Do · Work independently

BLACK PEN: Write your own answers. Do not look at the Review & Improve pages yet.

Code First · Predict → Write → Test → Improve

Correct the index so this array prints the number 8.

```
array weights = [1,2,4,8]
print(weights[2])
```

iterate

Question 1

Explain why a bare 'faster' may fail to score an explanation mark. [2 marks]

Question 2

Correct the statement: 'MAC addresses route packets between networks'. [2 marks]

Question 3

Describe one effective correction routine after an assessment. [3 marks]

Exit Ticket · Answer before checking

A model answer should be memorised word-for-word instead of explaining the missing reasoning.

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Review & Improve · GREEN PEN

Now change to GREEN PEN. Find each original question. Tick correct answers; read the model and rewrite mistakes.

Page 1 onwards · Do Now

Q1. The Computer Misuse Act 1990.

Q2. D — Electronic waste

Q3. Unauthorised access to computer systems and related prohibited activities.

Q4. (a) The OS shares memory, resources and CPU time between apps. (b) User management controls accounts, login checks and access rights.

I Do / We Do pages · Guided practice

Q1. Compare with a switch forwarding frames on a LAN.

You Do pages · Code First

```
array weights = [1,2,4,8]
print(weights[3])
```

Expected result: 8

You Do pages · Independent questions

Q1. It lacks the causal mechanism and scenario-specific improvement required by the question.

Q2. IP addressing/routing is used by routers; MAC addresses support local data-link forwarding.

Q3. Identify missing mark point, rewrite fully and attempt a new transfer question.

Exit Ticket · Model answer

False
