EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

Repeating the final answer without the working is always sufficient to gain method marks.

How confident are you? Circle one: Confident / Getting there / Need help

Explain your choice, identifying one concept you can now use independently.

GREEN PEN — Correct and explain

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

Next step: revisit the model or a relevant revision-guide section if needed.

DO NOW — RECALL

Paper 1 examiner-style feedback

Name: _____ Class: _____ Date: _____

1. Why does cache hit reduce memory delay?

2. What does a model answer need for a 6-mark explanation?

3. What is a mark-scheme method point?

4. Convert binary 01011000_2 to hexadecimal and decimal.

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

It may avoid a slower main-memory access.

2. Model answer

Accurate mechanism, context and supported consequences.

3. Model answer

Credit for a correct intermediate step or justified inference.

4. Model answer

58_{16}, decimal 88 (64+16+8).

By the end, you can…

- Diagnose rather than praise vaguely
- Show full method
- Demonstrate transfer

Vocabulary — know these terms

evaluation — Judgement supported by evidence.

method mark — Award for correct reasoning step.

misconception — Incorrect conceptual model.

transfer — Applying learning to unfamiliar problem.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 3

Explain why 9-mark evaluations need balanced, contextual judgement, using a hypothetical school cloud-storage deployment. [6]

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 1

Rewrite 'Harvard is faster' to explain architecture and qualify performance. [6]

Question 2

An answer says −6 is 11111001_2 in 8-bit two's complement. Correct it with full working. [6]

NEW LEARNING

Read, annotate and explain

Diagnose rather than praise vaguely

Separate inaccurate knowledge, missing context and absent justification; use an explicit improvement target.

Show full method

Write intermediary calculations, trace states and correctly named registers or SQL keys.

Demonstrate transfer

Apply the improved method to a different question, not a copied mark-scheme answer.

Explain one step in your own words, using the correct technical terms.

I DO — WORKED EXAMPLE

Follow the worked method

Improve 'pipelining makes instructions twice as quick'.

Predict first

Name the mechanism—overlapping stages of different instructions—rather than speeding an individual stage.

Check reasoning

State a limitation, such as dependency stalls or branch flushes.

WE DO — GUIDED PRACTICE

Try → Discuss → Improve
