EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

An ID selector generally has higher specificity than a simple element selector.

How confident are you? Circle one: Confident / Getting there / Need help

Explain your choice, identifying one concept you can now use independently.

GREEN PEN — Correct and explain

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

Next step: revisit the model or a relevant revision-guide section if needed.

DO NOW — RECALL

Lesson 151 · CSS: Selectors, Cascade, Specificity and th

Name: _____ Class: _____ Date: _____

1. How does HTML associate a label with an input?

2. What data structure follows LIFO?

3. What is a database foreign key?

4. What is the role of a router?

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

label for matches input id.

2. Model answer

Stack.

3. Model answer

A reference to a key in another table.

4. Model answer

Forward packets between IP networks.

By the end, you can…

- Element p, class .notice and ID #notice target elements.
- Specificity affects which competing declaration wins.
- Content, padding, border and margin affect occupied space.

Vocabulary — know these terms

selector — Rule matching HTML elements.

specificity — Priority of selectors among competing declarations.

box model — Content plus padding, border, margin.

cascade — Conflict resolution for CSS rules.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 3

A content-box panel is 240px with 12px horizontal padding, 3px borders and 8px margins on both sides. Calculate overall space and compare border-box. [8]

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 1

Write CSS to make h2 navy and .key items bold. [4]

Question 2

Explain relative specificity of p, .intro and #intro when all match an element. [6]

NEW LEARNING

Read, annotate and explain

Select

Element p, class .notice and ID #notice target elements.

Prioritise

Specificity affects which competing declaration wins.

Measure

Content, padding, border and margin affect occupied space.

Explain one step in your own words, using the correct technical terms.

I DO — WORKED EXAMPLE

Follow the worked method

p{color:black}, .notice{color:blue}, #flag{color:green} all match one element. Which colour?

Type selects black

Identify the input or diagram and predict the first result.

Class selects blue

Follow the second stage and explain its importance.

ID selects green

Green: matching ID selector generally outranks the class and element selectors where origin, importance and layers are equal.
