EXIT TICKET / REFLECTION

Check your understanding

Complete the actual lesson Exit Ticket before checking the answer.

Knowing a valid password always makes access legally authorised.

How confident are you? Circle one: Confident / Getting there / Need help

Explain your choice, identifying one concept you can now use independently.

GREEN PEN — Correct and explain

Choose one mistake from your independent work. Write the correct method and explain precisely why your original answer was wrong.

Next step: revisit the model or a relevant revision-guide section if needed.

DO NOW — RECALL

Lesson 158 · Computer Misuse Act 1990: Permission and

Name: _____ Class: _____ Date: _____

1. What UK legislation replaced the Data Protection Act 1998?

2. What is the worst-case order of binary search?

3. What is referential integrity?

4. What is the purpose of an operating system's memory management?

DO NOW — CHECK / OBJECTIVES

Correct and improve

Check page 1 in GREEN PEN. Write corrections in full.

1. Model answer

The Data Protection Act 2018 (alongside UK GDPR).

2. Model answer

O(log n) on sorted random-access data.

3. Model answer

Foreign keys refer to valid parent keys, subject to allowed NULL/policies.

4. Model answer

Allocating and protecting memory for running programs.

By the end, you can…

- Section 1 concerns knowing unauthorised access to computer material.
- Section 2 concerns unauthorised access intending to commit/facilitate further offences.
- Section 3 addresses unauthorised acts impairing operation/data, or reckless impairment.

Vocabulary — know these terms

unauthorised access — Access without the required permission.

section 1 — Knowing unauthorised access to computer material.

section 2 — Unauthorised access intending to commit or facilitate another offence.

section 3 — Unauthorised acts intending or recklessly causing impairment.

YOU DO — INDEPENDENT PRACTICE

Questions · Part 2

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 3

Compare three cases: unauthorised account entry, entry to facilitate fraud, and deliberately disabling a network service. Relate to sections 1, 2, 3. [8]

YOU DO — INDEPENDENT PRACTICE

Questions · Part 1

Answer independently. Show code, calculations, a trace or justified reasoning as appropriate.

Question 1

Explain the distinction between knowing unauthorised access and access with further criminal intent. [6]

Question 2

A pupil logs into a friend's account without permission but changes nothing. Explain whether absence of damage guarantees legality. [6]

NEW LEARNING

Read, annotate and explain

Unauthorised access

Section 1 concerns knowing unauthorised access to computer material.

Further criminal intent

Section 2 concerns unauthorised access intending to commit/facilitate further offences.

Impairment

Section 3 addresses unauthorised acts impairing operation/data, or reckless impairment.

Explain one step in your own words, using the correct technical terms.

I DO — WORKED EXAMPLE

Follow the worked method

A pupil correctly guesses a teacher's password, then signs in to view private records despite knowing permission is absent. Which offence may apply?

Password discovered

Identify the relevant facts, purpose and authority.

Login not authorised

Discuss which law or safeguard fits the situation.

Section 1 risk

Section 1 can apply to knowing unauthorised access even if no data is changed. The correct password does not supply authorisation. Additional offences depend on intent and conduct; do not assume every access is a section 2 offence.

WE DO — GUIDED PRACTICE
