STAFF REVIEW · H446 291 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Document structure or semantics.

2. The HTML body.

3. Confidentiality and integrity of transport, with server authentication.

4. The new sequence is [3,5,7,9], sum 24; fixed-size arrays need allocation/copy or suitable list structure.

I Do — source worked steps

1. Predict first — The action sets the destination path '/find' and GET encodes form fields into URL query parameters.

2. Show method — The input name 'q' becomes the query key and 'binary' the value.

We Do — guided CHECK

1. Predict first
The label for and input id must match exactly.
Show method
The email input type provides built-in browser constraints, but the server must validate again.

You Do — source mark schemes

1. Document root [1], metadata [1], rendered content [1], collection/submission [1], data field [1], accessible descriptive association [1].

2. form action='/check' method='get' [2]; label for age [1], input id age [1], name age [1], resulting query key age [1].

3. Client controls can be bypassed [2]; invalid/malicious requests can be sent directly [1]; validate on server [2], error handling/accessibility [1].

Exit Ticket — source answer

1. False. Server-side checks remain essential.
