STAFF REVIEW · H446 294 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. A reference to another page/resource.

2. A structure associating terms or keys with documents/records.

3. A directed graph.

4. 25>20 go right to30; 25<30 go left of30.

I Do — source worked steps

1. Predict first — Outgoing degree of A is two, so its rank is divided across two outgoing edges.

2. Explain — Both B and C receive half of A's contribution before damping and other link contributions.

We Do — guided CHECK

1. Predict first
The outgoing links split A's contribution evenly in the simplified model.
Explain
C receives 0.10; final PageRank needs damping, all incoming contributions and repeated iterations.

You Do — source mark schemes

1. Crawling fetches/discovers pages [2]; indexing structures information for efficient query retrieval [2].

2. C receives from A and B [2]; A has two outgoing links [2]; A contributes 0.4/2=0.2 to C [2].

3. Importance weighted by linking pages [2]; outgoing degree splits contributions [1]; damping/teleportation [1]; repeated iterative convergence [1]; other ranking signals used in real search [1].

Exit Ticket — source answer

1. False. Link weights, outgoing degree and damping matter.
