# Exit Ticket · reflect and retrieve

## Exit Ticket

A chart that uses distinct red and green colours needs no other status labels.

## Use key vocabulary from memory

1. Explain e-waste in your own words.

2. Explain censorship in your own words.

3. Explain accessibility in your own words.

## Confidence and next step

How confident are you? Thumbs up / side / down

Which question would you improve after checking the classroom model?

Check answers after the lesson using the teacher-guided source models.

RHS COMPUTING / OCR H446 / LESSON 297 DRAFT · TEACHER REVIEW

# Do Now · retrieval

## Environment, censorship and digital accessibility

Name: _____ Class: _____ Date: _____

Answer four retrieval questions before reviewing earlier learning.

### Q1

What is a false positive in content moderation?

### Q2

Why is Unicode used?

### Q3

Give one environmental concern with data centres.

### Q4

ASCII capital A is decimal 65. Encode string 'ABA' with 8 bits per character: total bits and bytes.

# New Learning · key ideas

The important knowledge from today's lesson. Read, annotate, and explain it.

## Core idea 1

Understand — Digital infrastructure consumes electricity and hardware resources; energy demand, device lifetimes, repairability and electronic waste are part of environmental evaluation.

## Core idea 2

Apply — Censorship and moderation can restrict harmful content, but also threaten freedom of expression and access to information. Evaluate proportionate rules, appeals and transparency.

## Core idea 3

Evaluate — Accessible design goes beyond attractive colours: sufficient contrast, structural headings, meaningful labels, keyboard access, language/character support and alternatives to colour-only cues.

**Key visual · complete concept**

## Annotate the key visual

Explain which labels or features show the main process.

# You Do · extended practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

## Question 3

Evaluate both environmental and social impacts of replacing school laptops every two years instead of extending safe service life. [6]

Check that you have used the technical terms and explained your decisions.

# You Do · independent practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

## Question 1

Explain three features that make a website more accessible to diverse users. [6]

## Question 2

Discuss two benefits and two risks of automated content moderation on a school platform. [8]

Check that you have used the technical terms and explained your decisions.

RHS COMPUTING / OCR H446 / LESSON 297 DRAFT · TEACHER REVIEW

# New Learning · applying the ideas

## Vocabulary · use the correct technical terms

e-waste — Discarded electrical/electronic equipment.

censorship — Restrictions on expression/content.

accessibility — Use by people with varied needs.

contrast — Visual difference aiding readability.

## Check your understanding

Explain one key process in your own words using two of the terms above.

More animated examples are available in the original online lesson.

# I Do · worked example

## Problem

A chart shows success only with green and failure only with red. How can you improve accessibility?

## Follow the worked method

1. Predict first — Colour-only status is inaccessible to users with some colour-vision differences.

2. Explain — Add words and/or shapes alongside adequate contrast; do not rely on colour as the sole signal.

**Source model · final illustrated step**

## Why this method works

Identify the decision, rule or invariant that makes the method correct.

# We Do · Try → Discuss → Improve

TRY independently in BLACK PEN; compare methods with a partner; improve your reasoning.

## Guided problem · TRY

Predict first
Blanket removal prevents harmful posts but can also silence legitimate discussion and learning.

## DISCUSS

Compare how you reached the answer. Where could someone make an error?

## IMPROVE

Add one precise correction or a stronger reason. Answers are not printed here.
