Exit Ticket · reflect and retrieve

Exit Ticket

Repeating the final answer without the working is always sufficient to gain method marks.

Use key vocabulary from memory

1. Explain evaluation in your own words.

2. Explain method mark in your own words.

3. Explain misconception in your own words.

Confidence and next step

How confident are you? Thumbs up / side / down

Which question would you improve after checking the classroom model?

Check answers after the lesson using the teacher-guided source models.

RHS COMPUTING / OCR H446 / LESSON 307 DRAFT · TEACHER REVIEW

Do Now · retrieval

Paper 1 examiner-style feedback

Name: _____ Class: _____ Date: _____

Answer four retrieval questions before reviewing earlier learning.

Q1

Why does cache hit reduce memory delay?

Q2

What does a model answer need for a 6-mark explanation?

Q3

What is a mark-scheme method point?

Q4

Convert binary 01011000_2 to hexadecimal and decimal.

New Learning · key ideas

The important knowledge from today's lesson. Read, annotate, and explain it.

Core idea 1

Diagnose rather than praise vaguely — Separate inaccurate knowledge, missing context and absent justification; use an explicit improvement target.

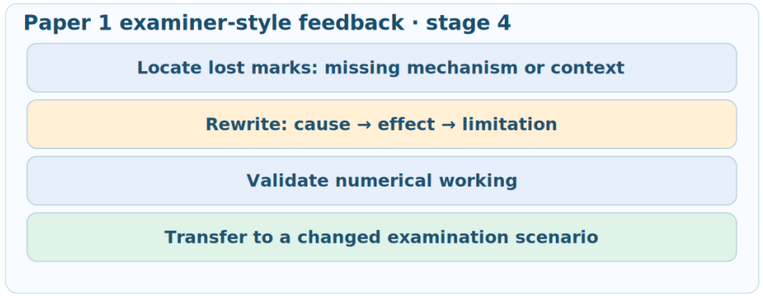

Core idea 2

Show full method — Write intermediary calculations, trace states and correctly named registers or SQL keys.

Core idea 3

Demonstrate transfer — Apply the improved method to a different question, not a copied mark-scheme answer.

Key visual · complete concept

Annotate the key visual

Explain which labels or features show the main process.

You Do · extended practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 3

Explain why 9-mark evaluations need balanced, contextual judgement, using a hypothetical school cloud-storage deployment. [6]

Check that you have used the technical terms and explained your decisions.

You Do · independent practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 1

Rewrite 'Harvard is faster' to explain architecture and qualify performance. [6]

Question 2

An answer says −6 is 11111001_2 in 8-bit two's complement. Correct it with full working. [6]

Check that you have used the technical terms and explained your decisions.

New Learning · applying the ideas

Vocabulary · use the correct technical terms

evaluation — Judgement supported by evidence.

method mark — Award for correct reasoning step.

misconception — Incorrect conceptual model.

transfer — Applying learning to unfamiliar problem.

Check your understanding

Explain one key process in your own words using two of the terms above.

More animated examples are available in the original online lesson.

I Do · worked example

Problem

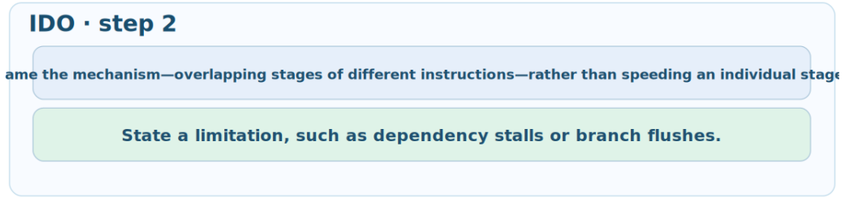

Improve 'pipelining makes instructions twice as quick'.

Follow the worked method

1. Predict first — Name the mechanism—overlapping stages of different instructions—rather than speeding an individual stage.

2. Check reasoning — State a limitation, such as dependency stalls or branch flushes.

Source model · final illustrated step

Why this method works

Identify the decision, rule or invariant that makes the method correct.

We Do · Try → Discuss → Improve

TRY independently in BLACK PEN; compare methods with a partner; improve your reasoning.

Guided problem · TRY

Predict first
Name the matching attribute and type of join rather than a generic table combination.

DISCUSS

Compare how you reached the answer. Where could someone make an error?

IMPROVE

Add one precise correction or a stronger reason. Answers are not printed here.
