STAFF REVIEW · H446 315 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Domain name to an IP address.

2. Forwards IP packets between networks.

3. Discards information irreversibly.

4. $00000011_2 = 03_{16}$.

I Do — source worked steps

1. Predict first — Count consecutive symbols, preserving the order of groups.

2. Explain and check — Explain the reason for the result.

We Do — guided CHECK

1. Predict first
A matching hash is evidence of integrity only when its expected value comes from a trustworthy channel.
Explain and check
Explain the reason for the result.

You Do — source mark schemes

1. DNS maps name/IP [2], router forwards between networks [2], TLS protects/authenticates channel [2].

2. (A,5) [1],(B,3) [1],(C,2) [1],(D,2) [1]; repeat each character count times [2].

3. Exact data needed [2], lossless preserves digits [1], TLS/confidentiality [1], authenticity/integrity via trusted mechanism [1], access permissions [1].

Exit Ticket — source answer

1. False. A hash is not reversible encryption.
