BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Data Protection Act 2018

Name _____ **Class** _____ **Date** _____ **Time** _____ **Teacher** _____

Do Now - Four retrieval questions

BLACK PEN: answer four questions before checking the answers.

1. Give an environmental impact of frequent device replacement.

2. Which is a physical security measure?

A) A locked server room
B) A strong password
C) File compression
D) A software licence

3. A bitmap uses 3 bits per pixel. How many different colours are possible? If depth rises by one bit, what happens to the colour capacity?

4. An image is 30 x 20 pixels. Both dimensions double at the same colour depth. What happens to pixel count and raw size? Explain.

Today's objectives

State the purpose of the Data Protection Act 2018. Explain duties when collecting, using and keeping personal data.

Key vocabulary - Read, cover, recall

Data Protection Act 2018
UK legislation governing the handling of personal data.

Personal data
Information relating to an identified or identifiable living person.

Data minimisation
Collecting no more personal data than needed for a stated purpose.

Lawful basis
Legitimate legal justification for processing personal information.

Write one key term and its meaning in your own words:

Do Now	I Do	We Do	You Do	Review & Improve
Recall previous learning	Read new knowledge	Practise with guidance	Work independently	Check my understanding

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Learn and practise

New learning - Key ideas

Why data protection law exists	The UK Data Protection Act 2018 sits alongside the UK GDPR framework and protects individuals when organisations handle personal data. Organisations must have a lawful basis for processing.
Collection and transparency	Tell people why their data is collected and use it for clear, legitimate purposes. Collect no more personal information than is necessary for that purpose.
Accuracy and retention	Keep personal data accurate and up to date where needed. Do not retain identifiable information longer than necessary for the purpose.
Security and people's rights	Apply appropriate protection, limit access and respect applicable rights to access or correct their information. A lost unencrypted device with pupil records can create a serious data-protection risk.

I Do - One worked example

A school trip form asks for a pupil's medical needs, emergency contact and favourite television programme. Explain TWO data-protection concerns. [4 marks]

1. Identify the trip's legitimate purpose: safety and communication.

2. Emergency and medical information may be necessary [1] to support safe trip management [1].

3. A favourite television programme is not relevant [1], so collecting it breaches the aim of data minimisation [1].

4. Use precise language: collect data that is necessary for a specified legitimate purpose.

We Do - Guided questions

BLACK PEN: use the model, then explain your answer.

1. A sports club stores members' home addresses indefinitely after cancellation. Explain the data-protection concern and an improvement. [4 marks]

2. A council website uses an out-of-date address for a resident. Explain one duty relating to data accuracy and how the error could affect the resident. [4 marks]

3. A hospital stores unencrypted patient records on a shared laptop. Explain TWO ways it could improve security. [4 marks]

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Think and write

Code First - Predict > Write > Test > Improve

YOUR TASK: Predict how many fields should be collected.

```
totalFields = 5
unneededFields = 2
print(totalFields - unneededFields)
```

BLACK PEN: predict or complete the code; test, then improve.

You Do - Independent exam questions

Q2. State the overall purpose of the Data Protection Act 2018. [2 marks]

Q3. A school app requests pupils' names, emergency contacts and favourite music. Explain TWO data-protection responsibilities when collecting this information. [4 marks]

Q4. Describe THREE ways a company should protect personal data under UK data-protection requirements. [6 marks]

Exit Ticket - True or False?

Circle T or F before reviewing Page 4.

1. Data minimisation means collecting every possible detail in case it becomes useful later. ☐ T ☐ F
2. The UK Data Protection Act 2018 sits alongside the UK GDPR framework and protects individuals when organ... ☐ T ☐ F
3. Tell people why their data is collected and use it for clear, legitimate purposes ☐ T ☐ F

BLACK PEN Answer all questions first. **GREEN PEN** Then: tick correct answers; rewrite mistakes.

Review & improve

GREEN PEN: tick correct marking points, then correct errors.

Choose your hardest question to rewrite in full below.

Do Now - Answers

Q1 Manufacturing uses energy and raw materials, and disposal can add electronic waste. ☐

Q2 A - A locked server room ☐

Q3 8 colours; one extra bit doubles capacity to 16. ☐

Q4 (a) 600 pixels become 2,400. Raw size is four times larger because both dimensions double. ☐

Code First - Model

```
totalFields = 5
unneededFields = 2
print(totalFields - unneededFields)
```

Output: 3

We Do - Check the model

1. Personal data should not be kept longer than needed [1], so indefinite retention without a valid purpose is inappropriate [1]. The club should set a justified retention period [1] and securely delete records once no longer required [1]. ☐

2. The organisation must take reasonable steps to keep personal information accurate [1] and correct inaccuracies when identified [1]. An old address [1] could cause important correspondence to go to the wrong place [1]. ☐

3. Encrypt stored records [1], so a stolen laptop does not expose readable files without a key [1]. Restrict accounts and permissions [1], so only authorised staff can access the patient data [1]. ☐

Exit Ticket - Check

1. FALSE 2. TRUE 3. TRUE

You Do - Self-mark

Q2 Regulates/protects the processing of personal data [1] and helps protect people's privacy/information rights [1]. ☐

Q3 Identify and communicate a lawful, specific purpose [1], so people know why data is collected [1]. Minimise personal information collected [1], avoiding unnecessary items such as favourite music [1]. ☐

Q4 Use a lawful purpose and tell data subjects about processing [2]. Keep information accurate, correcting known errors [2]. Store it securely through limited permissions/encryption [2]. Other appropriate duties, such as minimisation or retention limits, may be credited. ☐
