STAFF REVIEW · H446 264 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Loads ACC from a mailbox.

2. Coordinates and decodes execution.

3. An instance of a program being executed or scheduled.

4. 5: 32→16→8→4→2→1.

I Do — source worked steps

1. Predict first — The OS checks authorisation before returning content; a missing permission should prevent the read.

We Do — guided CHECK

1. Predict first
The print job enters a queue and is later sent via a compatible printer driver when the device is available.

You Do — source mark schemes

1. Process scheduling, memory management, file management and device management [1 each].

2. Request [1], identify user [1], authorisation [1], filesystem lookup [1], driver/device request [1], return or deny [1].

3. CPU scheduling [2], memory allocation/isolation [2], I/O management [1], permissions [1].

Exit Ticket — source answer

1. False. The OS provides services and drivers.
