STAFF REVIEW · H446 190 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. O(n).

2. It must exclude mid and shrink the search interval.

3. false.

4. 5.

I Do — source worked steps

1. Predict first — Which x is in scope at the print statement?

2. Model solution — The method-local x is 2 and shadows the field. The program prints 2.

We Do — guided CHECK

1. Model solution
The class field is modified to 25, then 25 is printed.

You Do — source mark schemes

1. 4, because the local level shadows the field.

2. 3, because no local attempts was declared, so the class field is incremented.

3. Different methods can alter shared state unexpectedly, making dependencies, debugging and testing harder; prefer a local value or parameter where appropriate.

Exit Ticket — source answer

1. False. A local of the same name usually shadows the field, leaving the field unchanged.
