STAFF REVIEW · H446 238 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Testing a small module or function independently.

2. An input requirement that must hold before execution.

3. Objects/locations and connections.

4. It lacks travel-time weights.

I Do — source worked steps

1. Predict first — Model each bus stop as a vertex and each permitted connection as an edge.

2. Model and check — Vehicle colour is irrelevant. To find fastest rather than fewest-stop routes, add journey-time weights.

We Do — guided CHECK

1. Predict first
Only valid marks and the number of entries are needed to compute the mean.
Model and check
Define how to handle missing results. Other pupil attributes need not be stored for this calculation.

You Do — source mark schemes

1. [4] Relevant: product identifier and quantity [2]; irrelevant to stock: label colour and shop music [2].

2. [6] Room identifier [1], lesson start [1], lesson end [1]; compare overlapping times in same room [1]; omit poster colour [1] and desk appearance [1].

3. [6] Reduces storage [1], complexity [1] and irrelevant data exposure [1]; keeps purpose clear [1]; journey duration becomes relevant when switching from fewest stops to fastest route [2].

Exit Ticket — source answer

1. False. It records properties relevant to the model's purpose.
