STAFF REVIEW · H446 241 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Because strict comparisons exclude both 12 and 18.

2. A named, reusable piece of a larger task.

3. The stored values of its properties or fields.

4. The save might fail even though the user has already been told it succeeded.

I Do — source worked steps

1. Predict first — First identify the account and create a single-use reset token.

2. Model the reasoning — Check the token before accepting a new password.

3. Model the reasoning — Save the change successfully before confirming to the user.

We Do — guided CHECK

1. Predict first
Identify the book and verify availability before trying to record a loan.
Model the reasoning
Store the loan and change availability, then confirm only if those actions succeed.

You Do — source mark schemes

1. [4] Take request [1], check payment [1], record purchase [1], issue ticket [1].

2. [6] ValidateInput [1], CheckRoomAvailable [1], SaveBooking [1], SendConfirmation [1]; check room before save [1], save before confirm [1].

3. [6] Parameter is a copy [1], central count unchanged [1], another user could book same seats [1]; update stored capacity [1], use an atomic save/check [1], confirm only after successful save [1].

Exit Ticket — source answer

1. False. The save might fail, leaving an unconfirmed booking in reality despite the message.
