STAFF REVIEW · H446 269 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Round Robin.

2. A task can be indefinitely denied execution.

3. Meeting the specified response deadline.

4. Q remains 0; only D at the active clock edge is sampled.

I Do — source worked steps

1. Predict first — Predictable bounded response is required to meet safety deadlines.

2. Model and check — Explain why each value follows from the earlier step.

We Do — guided CHECK

1. Predict first
Many accounts require permissions and several running processes share CPU time.
Model and check
Explain why each value follows from the earlier step.

You Do — source mark schemes

1. Real-time deadlines [1]; embedded dedicated [1]; distributed machines [1]; multi-user accounts [1]; multitasking processes [1].

2. Embedded purpose and restricted hardware [3]; real-time bounded response to critical deadline [3].

3. Distributed spans cooperating computers [2]; multi-user isolates independent accounts [2]; multitasking schedules multiple process workloads [2].

Exit Ticket — source answer

1. False. OS type classifications overlap.
