STAFF REVIEW · H446 271 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Manages guest VMs.

2. Provides OS-to-hardware interface.

3. Software that maintains, protects or manages the system.

4. $1+1+1=3=11_2$, hence sum1, carry1.

I Do — source worked steps

1. Predict first — A user task and system-protection task call for different software classes.

2. Model and check — Explain why each value follows from the earlier step.

We Do — guided CHECK

1. Predict first
The licence fee alone does not capture staff training, integration and upgrade costs.
Model and check
Explain why each value follows from the earlier step.

You Do — source mark schemes

1. Application, utility, application, utility [1 each].

2. Open-source has source and modification/redistribution rights [2]; proprietary often restricts source [2]; customisation [1]; commercial support possible [1].

3. Licence [1], support [1], file-format interoperability [1], training [1], accessibility/security [1], migration risk [1].

Exit Ticket — source answer

1. False. Licence permissions determine those rights.
