Exit Ticket · reflect and retrieve

Exit Ticket

An SQL LIKE pattern uses * to mean any sequence of characters.

Use key vocabulary from memory

1. Explain INSERT in your own words.

2. Explain DELETE in your own words.

3. Explain DROP TABLE in your own words.

Confidence and next step

How confident are you? Thumbs up / side / down

Which question would you improve after checking the classroom model?

Check answers after the lesson using the teacher-guided source models.

RHS COMPUTING / OCR H446 / LESSON 279 DRAFT · TEACHER REVIEW

Do Now · retrieval

SQL INSERT, DELETE, DROP and LIKE

Name: _____ Class: _____ Date: _____

Answer four retrieval questions before reviewing earlier learning.

Q1

What does a primary key enforce?

Q2

What does SELECT * mean?

Q3

What is a foreign key used for?

Q4

Simplify A ∨ (¬A ∧ B) using a Boolean identity.

New Learning · key ideas

The important knowledge from today's lesson. Read, annotate, and explain it.

Core idea 1

Understand — INSERT adds a row; DELETE removes records matching a WHERE predicate. Omitting WHERE can delete every row.

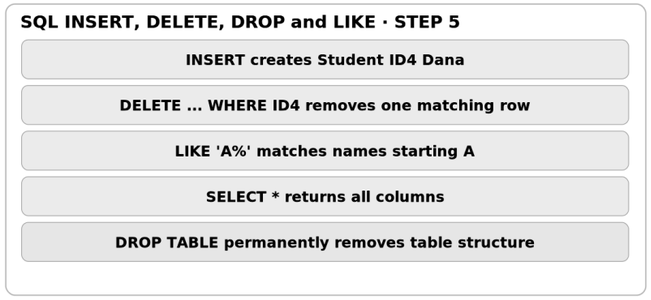

Core idea 2

Trace — DROP TABLE removes the table itself, not just one record. It is a destructive schema operation.

Core idea 3

Explain — LIKE uses % for any number of characters and _ for a single character in standard SQL. SELECT * means all columns, a different use of *.

Key visual · complete concept

Annotate the key visual

Explain which labels or features show the main process.

You Do · extended practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 3

Explain difference between SELECT *, LIKE 'A%' and DROP TABLE. Give a use and consequence of each. [6]

Check that you have used the technical terms and explained your decisions.

You Do · independent practice

Answer these selected original questions in BLACK PEN. Other exam tasks remain online.

Question 1

Give correct SQL to add a row (7,'Elena') to Student(ID,Name). [4]

Question 2

Explain DELETE FROM Student without WHERE, and write a safer deletion for ID=7. [6]

Check that you have used the technical terms and explained your decisions.

New Learning · applying the ideas

Vocabulary · use the correct technical terms

INSERT — Add records.

DELETE — Remove matching records.

DROP TABLE — Remove table definition/data.

LIKE — Pattern matching.

Check your understanding

Explain one key process in your own words using two of the terms above.

More animated examples are available in the original online lesson.

I Do · worked example

Problem

How would you remove only Student ID=8 without dropping the table?

Follow the worked method

1. Predict — DELETE with a key-based WHERE targets that record

2. Check the answer — DROP TABLE would remove the entire table.

Source model · final illustrated step

IDO · STEP 2

DELETE with a key-based WHERE targets that record

DROP TABLE would remove the entire table.

Why this method works

Identify the decision, rule or invariant that makes the method correct.

We Do · Try → Discuss → Improve

TRY independently in BLACK PEN; compare methods with a partner; improve your reasoning.

Guided problem · TRY

Predict

Jo, John and Joanne match

DISCUSS

Compare how you reached the answer. Where could someone make an error?

IMPROVE

Add one precise correction or a stronger reason. Answers are not printed here.
