STAFF REVIEW · H446 282 source models

Separate from the eight-page pupil workbook. This copy is in a public repository and is NOT access controlled. Check technical correctness before use.

Printed question mapping: Booklet Q1 = original online Q1; Booklet Q2 = original online Q2; Booklet Q3 = original online Q3

Do Now — source answers

1. Offers an interface to hardware.

2. Different IP networks.

3. Client requests service from a dedicated server.

4. mid7, mid11, mid13; target found at index13.

I Do — source worked steps

1. Predict — Switch moves frames within LAN

2. Check the answer — router handles packets destined for another network.

We Do — guided CHECK

1. Predict
APs provide wireless access
Check the answer
switch connects local devices
client-server centralises authentication/files.

You Do — source mark schemes

1. LAN local network [1], WAN wide-area connection [1], switch forwards LAN frames [1], router joins IP networks [1].

2. NIC/Wi-Fi interface [1], AP receives frame [1], switch forwards on LAN [1], router selects external network [1], ISP/WAN carries traffic [1], return follows appropriate route [1].

3. Client-server central storage/permission policies [2] but server dependency/cost [1]; P2P direct resource sharing [2] but decentralised management [1].

Exit Ticket — source answer

1. False. Their usual layer and forwarding responsibilities differ.
